To Deliver.
The Best

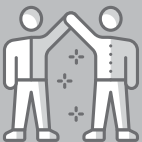

CORE VALUES

WHAT MAKES US DIFFERENT

Relationships

We develop a strong sense of teamwork by developing a strong working alliance with our employees and customers. This helps us to increase morale, productivity, and job satisfaction.

Unity

We build an encouraging, caring, and supportive environment by sharing a responsibility to support our team members and enrich their lives.

Transparent Deal

Transparency helps our employees to engage more and committed to the vision of our company. The reason is, they fully understand the mission and feel vested to share ideas, display their creativity, and bring about innovation to achieve the desired objective.

Heartfelt Service

We always try to provide an exceptional service that leaves the customer feeling valued and respected. Although providing an excellent service help us to maintain a positive reputation among future customers and encourage existing customers to purchase from our business again.

Systematic Organisation

We always try to create a perfect organizational values and help to build an enriched and effective work culture that influence the behavior of the employees and customers .

Enhancing People

We are committed to continuous investments in the growth of our team members. We always gave an opportunity to our teams to actively take responsibility for their own self-development .

WHY CHOOSE US?

With over a decade of heritage, we proudly operate 15 stores across India and UAE, and continue to expand our legacy.

REASONABLE PRICE

Non-competitive and reasonable price is our moto for business. We emphasize affordable prices for all varieties of customers.

QUALITY PRODUCTS

Quality products for each kind of customer to make sure customer satisfaction at every level.

BEST SERVICE

We focus on a customer-centric approach. Customer service made us one of the top trusted brands with huge number of customer potential over the period

Different types of roofing

Metal Roofing

Lightweight and portable, zero maintenance, resist fire, reflect sun's rays, variety of styles and colors, no crack, no breaks, durable, eco-friendly, warranties.

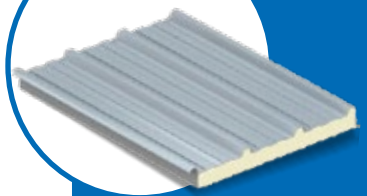

Different types of metal roofing

Galvanized Trafford sheet, Galvanized tile sheet, Galvanized Arch sheet, Galvanized Crimped sheet, Galvanised Corrugated sheet, Colour Coated Corrugated sheet, Galvanized Cladding sheet, Bare Galvalume sheets

Sandwich PUF panel

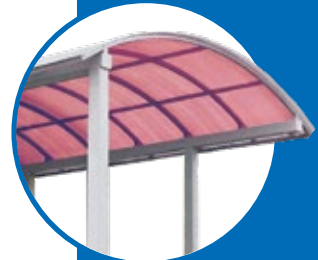

Can withstand heavy rainfall/snowfall and extreme temperature, prevents cross heat flow between room and outside ambience, no noise, long working life.

Polycarbonate sheets

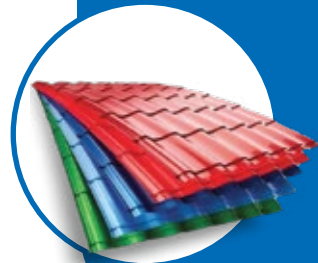

Polycarbonate is a strong and transparent thermoplastic material

Available in variety of qualities and thicknesses, UV Resistant, Nearly unbreakable, much lighter in weight, durable, moldable, resistant to breakage and cracks, attractive colours and designs, resist high and low temperature.

Aluminum roofing sheet

Reducing heat, corrosion-resistant, resist fire, Lightweight but strong, easy to install, long lasting, environment friendliness, resale value,

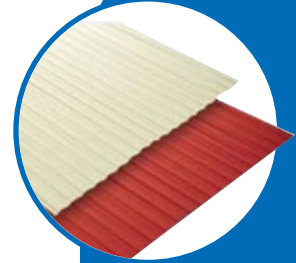

Liner / Cladding Sheet

Perfect Solution for Interior Applications like wall cladding and false ceiling. Liner Profile is an attractive, slightly fitted wall & ceiling cladding for exterior and interior use, on straight or curved surfaces.

- Attractive multi ribbed profile which is quick and easy to install
- Lightweight and economical profile which covers wide surface area
- Manufactured from high strength ZINCALUME steel or COLORBOND steel

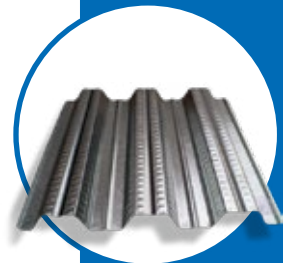

Galvanized Corrugated Sheet (GC Sheet)

Light weight, Strong & Durable

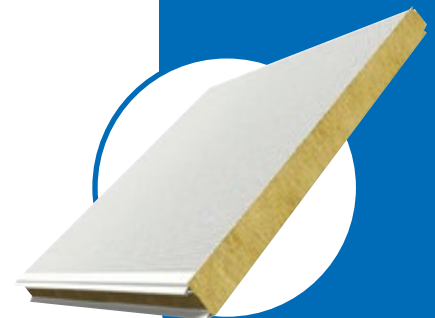

Decking Sheet

Lightweight, Waterproof, No major reinforcement required, Deck can be used as a working platform during construction, Speedy construction enables faster completion of project, Decking reduce the construction time, hence the total cost.

Thermal insulated panels

Heat resistant, low noise, controlling humidity, cost effective and Long life, low maintenance, energy saving, fast and easy to install with less labor work.

Shingles

Shingles are composites of reinforced fiberglass mesh and mineral stabilized, high grade asphalt, which has been overlaid with high strength ceramic coated granules.

Affordability, Easy Installation, Versatility, Variety, Safety

Clay / Ceramic tiles

Ceramic roof tiles also known as clay roof tiles are a perfect option for low slope and pitched roofs. ceramic roof tiles have the lowest life cycle cost and they stand the test of time more than any other roofing material.

Long-lasting, Impervious to rot and insect damage, Environmentally friendly material, Energy efficient, Low maintenance, fire resistant.

Multicell polycarbonate panels

Multicell polycarbonate panels is designed for architectural daylight applications. It consists of a design which gives it lower thermal conductivity, a higher resistance to impact and hail damage,

Exception quality of light, high thermal insulation, UV protection, high impact and weather resistance

Tensile roofs

construction of roofs using a membrane held in place on steel cables, which work under stress tensile.

Tease of pre-fabrication, their ability to cover large spans, and their malleability.
