

Gasco Safety Equipment Installation LLC

Professional | Innovative | Reliable

WHO WE ARE

GASCO was established in 2019 is principally engaged in Design, Supply & Installation of LPG and Fire System Work throughout UAE to become the foremost Company in the Middle East Region. We execute Projects based on All International Standard & Code of Practices, as per the Ministry of Interior Rules & Guidelines. The company has accreditation of ISO 9001:2008, ISO 140001:2004, OHSAS 45001:2007 and has proven record of effectual services for its design, Supply, Installation, Testing Commissioning of LPG and Fire System.

VISION & MISSION

Our Vision

To be the sublime company to set benchmark for others to follow in the field of LPG and Fire System Installation.

Our Mission

Gasco's mission is to offer its customers the highest quality of LPG and Fire System related Services. To Grow our business and extend our market share to earn our customers loyalty and awareness of our capabilities by delivering on time quality projects and gaining customer satisfaction utilizing world class service & Reso.

REASONS TO CHOOSE GASCO

Pioneers in Engineering Systems

We are committed to providing outstanding service and being the best gas fitters in the industry. The way we do this is to provide quality workmanship, reliability, and transparent fees. We work hard to maintain good working relationships with our Gold-Coast clients and we are proud to provide our own unique on-time price guarantee.

Innovation & Cost Saving Strategies.

At the end of the day cost determines the satisfaction of the customer. We propose feasibility of the gas, quality of the gas to be used for the longevity of utilization, Conversion of the gas system to the most efficient and effective one for existing developments for optimizing the cost in the future run. Authority regulation deemed in usage of certain system on safety perspectives we propose the system viability without compromising the financial necessity.

Health, Safety and Environment Practices

We place health, safety and best environmental practices firmly at the heart of our ethos. It remains at the forefront of our priorities, guiding how we conduct our business and operations. Our concerted efforts to maintain a high level of safety have yielded an improved.

Emergency Rapid Response

Our success depends on customer satisfaction and we ensure that we are always available to attend to emergencies 24/ 7. We think that its our responsibility to give around-the-clock rapid response for gas emergencies Whether you are an existing or a potential new customer, our commitment is to provide you with an emergency rapid response in the best possible way.

OUR SERVICES

GASCO is the leading Pioneer in design and installation of Gas and Fire system with prime focus on safety and longevity, giving cost effective solutions. We execute all gas and Fire System Projects all over UAE which includes,

- **Residential and Commercial Buildings**
- **Hotels & Resorts**
- **Villas & Labor Accommodations**
- **Restaurants & Central Kitchens**
- **Industries**
- **Shopping Malls & Recreational Centres**
- **Schools and Universities**
- **Hospitals & Medical Facilities**

LPG DIVISION

OUR CORE ACTIVITIES

- LPG Central Tank System Installation
- LPG Cylinder Manifold System Installation
- Annual Maintenance Contract
- LPG System and Metre Management
- LPG Tanker System Assembly & Maintenance
- LPG Storage Tank Testing & Certification
- LPG Filling Station Installation & Maintenance
- LPG Bulk Supply
- Industrial Gas Piping System
- Medical Gas Piping System

LPG System Installation

One of our core expertise lies in designing, installing and maintaining a central gas system powered by the latest technologies and accepted by international safety standards. Our passion for work and our technical expertise, enables us to execute the most complex of projects in the toughest of climatic and environmental conditions.

Consultancy

We help to prepare design of gas systems by collecting information regarding each project's specifications and requirements. Ensuring that the projects in every phase of execution are compliance with the requirements of the authorities, international standards and quality requirements.

Value Engineering helps in wrapping the projects within budgets without compromising system sustainability.

Bulk Gas Supply & Distribution

Gasco team of competent professionals looks after all aspects of fleet management to ensure continuous Gas supply to all its customers. We are currently delivering LPG and Propane Gas across UAE with our own fleet of Tankers and distribution network partners. The Gas tankers are maintained and tested regularly and certified by the local authorities. The gas tankers are also installed with tracking system to ensure accurate and timely supply of Gas. The distribution fleet gas meters are yearly calibrated and are certified to ensure accurate quantity is delivered to our satisfied customers.

Maintenance & Emergency Services

We provide maintenance services that are tailored to customer - specific requirements. Our highly skilled personnel offer maintenance solutions that are cost-effective and compliant with safety standards. Available separately or as part of our integrated solutions, we offer maintenance services across complex gas systems. Our 24-hour rapid response team is always at-the-ready to deal with gas concerns and any kind of emergency situations. Through our Emergency Contact Number, customers can call for emergency services as required.

Billing & Metering Management

Gasco has the most efficient and cost-effective solutions for Billing and Metering Management for the gas consumption in Residential, Commercial and Industrial customer. Our solution includes Manual metering, pre-paid metering, Smart metering, Automatic Reading & Internet of Things (IoT). Based on our long vision to be the most technological advanced gas utility company, Gasco is one of the first companies who implemented the smart metering system to streamline the process of gas billing, monitoring and payment procedures. Gasco provides direct billing and collection services to our clients on their door step; by our dedicated meter reading staff. Our preferred payment method is cash, online transfer and secure card transaction with bank machine available with our team.

Gas System Training

Training the customer and facility management division of the building about the gas system operation is mandatory as the quick response in situation of emergency reduce the potential hazards. We ensure briefing of the system to the customer, making them aware about the do's and don'ts at the time of gas system interruption or gas leakage in the system. Also pull the consciousness of the customer to utilize the system.

Project Management

We handle and can act as the client's representative for central gas systems for colossal developments, monitoring and controlling all phases of a project as well as ensuring its completion according to the budget, quality, time, and authority requirements.

FIRE DIVISION

Our services include the installation and maintenance of fire protection systems, provision of safety equipment, fire risk assessments, safety training, and compliance with relevant regulations, all geared towards ensuring the protection and well-being of individuals and property in various settings.

OUR CORE ACTIVITIES

- Fire Alarm System
- Fire Fighting System
- Emergency Lighting System
- Smoke Extraction System
- Fire Suppression system
- Fire Extinguishers

Fire Alarm System

A fire alarm system is a building system designed to detect and alert occupants and emergency forces of the presence of smoke, fire, carbon monoxide, or other fire-related emergencies. Fire alarm systems are required in most commercial buildings and Residential Buildings.

Fire Fighting System

A fire fighting system is a set of interconnected components designed to detect, suppress, or extinguish a fire in an emergency. These systems are typically found in buildings, structures, and vehicles to protect people and property from the devastating effects of fire.

Fire suppression system

A fire suppression system is a group of devices that work together to detect and extinguish a fire. These systems are typically found in buildings, structures, and vehicles to protect people and property from the devastating effects of fire.

Emergency Lighting system

By the nature of the device, an emergency light is designed to come on when the power goes out. Emergency Lighting System plays a key role during evacuation as it highlights the nearest path/door to exit overcoming all chaotic probabilities. Similar to the Fire Alarm System, we offer a wide scale of solutions for the lighting system.

Smoke extracting system

A smoke extracting system is a system of fans and ducts that are designed to remove smoke and other combustion products from a building in the event of a fire. Smoke extracting systems are typically used in commercial and industrial buildings, but they can also be installed in residential buildings.

Smoke extracting systems work by creating a negative pressure in the fire zone. This causes the smoke to be drawn into the system and exhausted to the outside.

Fire Extinguisher

You have come to the right place if you are seeking a fire extinguisher. We offer all types of fire extinguishers, including CO2 extinguishers and dry chemical powder extinguishers. Dry chemicals are used in dry powder equipment to control fires. You can spray them over the area affected with fire, and they will effectively extinguish the flames. If the fire is severe, keep spraying the powder until it dies down. We offer the best prices in UAE on dry powder extinguishers and make your premises safer.

CO2 extinguishers are also designed to control fires. An equipment that uses dry powder just extinguishes the flames, but CO2 extinguishers are more efficient since they cool the fire as well as neutralizing the oxygen supply, which helps control the fire quickly. The liquid CO2 contained in these extinguishers does not harm electronic devices, which makes them a perfect choice for commercial spaces.

AMC- FIRE MAINTENANCE

Be it a residential or commercial building, fire hazards are always devastating. They bring a lot of damage and life risk with them.

The good news is that there are systems that can effectively control fires and minimize damage to a large extent. You can install them in your premises and be at ease. However, everything needs maintenance after a while, so do your fire safety systems. They cannot be taken for granted and left without maintenance for a long period of time.

If you need an AMC for fire system and equipment, please reach out to us so we can help you.
