# Our Services

- Galley Services
- Galley Refurbishment
- Complete Wiring of Cooking Range
- All Types of Selector Switches
- All Types of Thermostat
- Complete Servicing of Cooking Range

## What we Do

HMS is committed to provide high quality heaters and other electrical items using standard procedures and validated equipment to fully comply and serve the customer requirements by continuously improving not only the operations as well as acting responsibly towards environment and safety.

## What we Can Do Onboard

**01.** All Types Heater Element

All Sizes of Hot Plates

**02.**

**03.** Calorifier Tanks

Tanks Cleaning

**04.**

**05.** All Types of Motor/Alternator Rewinding

## OUR MISSION

Kitchens are undeniably the heart of today's Ship so, understandably, you want your kitchen to look its best. Gold accents give inspiration for adding the latest design trends to your cooking space. HMS is affiliated with Seecatches and features unique concepts for modern and traditional kitchen furnishings. HMS are one of the perfect kitchen company in Dubai. Our professional kitchen designers listen carefully to your needs and create designs that meet them. Whether your home is in Dubai, Abu Dhabi, or anywhere in UAE, our installation team will be able to serve you.

## MARINE GALLEY

Galley was a type of ship which relied mostly on oars for propulsion that was used for warfare, trade, and piracy mostly in the seas surrounding Gulf & Europe

We Can Designed it at your Desired Requirments

# GALLEY ITEMS

## HOT PLATES

## ABOUT COMPANY

HMS carry a comprehensive range of BISI Product, available from stock includes: All kind for hotplate, thermostats, rotary switches, & energy regulators.

### Available Sizes

- Round:
  - Dia- 145/150mm
  - Dia-180mm
  - Dia-220mm
  - Dia-300mm
- Square:
  - 220mmX220mm
  - 300mmX300mm
- Rectangle:
  - 600mmX300mm

**BISI & EGO BRAND**  
**CE APPROVED**

# Galley Items

We have Very Special Team for Marine Galley Items

**Marine Galley Switch**

**Marine Galley Ceramin Switches of All types**

**All Types of Thermostat**

## Stock Available of All Types Marine Hot Plate

## OUR SERVICE

1. We can Dismantal and Assemble the complet cooking range.
2. We are very Specilaized in Cnages of Hot Plate & Complete Wiring

# Galley Hot Plate

A marine hot plate typically refers to a hot plate or electric heating element designed and manufactured for use on boats or ships. These hot plates are specially designed to be safe and functional in marine environments, where there may be additional considerations due to the presence of water, salt, and the need for stability. Some features and considerations for marine hot plates might include:

# MARINE CALORIFIER TANK

## OUR HISTORY

Holtech Heaters is a leading manufacturer of all kinds of Industrial Heaters and Calorifier Tanks. Here you can find a list of our products including Immersion heaters , Defrost heaters, Cartridge heaters, Mica band heater, Ceramic heaters, Glass Heaters, Silicon Pad Heater, short wave infrared heaters, medium wave infrared heaters, all kinds of Hot Plates (Square & round), tank heaters, mould heaters, blow moulding heaters and more. Give us a call for your heating requirements

## WHAT WE DO

At HMS, we have been working with a vision to make the world a cleaner, energy efficient and sustainable place for the coming generation. This vision drives us to conceptualize and create world class products that work on the principle of energy conservation and recycling.

## SOLUTIONS

HMS is committed to provide high quality heaters and other electrical items using standard procedures and validated equipment to fully comply and serve the customer requirements by continuously improving not only the operations as well as acting responsibly towards environment and safety.

## To customer

Our expert team of engineers have over 20 years of experience and have dedicated themselves to create the best products in the market, which help us stand out to become the best calorifier supplier in the entire UAE. You can look through our varied range of products and services and contact us to make any queries.

## Our Priority is Quality

HMS is committed to provide high quality heaters and other electrical items using standard procedures and validated equipment to fully comply and serve the customer requirements by continuously improving not only the operations as well as acting responsibly towards environment and safety.

## Your satisfaction

We have taken immediate action to rectify the situation and will offer you a [refund/replacement] for the affected product. Your satisfaction is our top priority, and we are committed to providing the best possible customer experience."

# CALORIFIER TANKS

## ADVANTAGE OF OUR CALORIFIER

Why should you invest your money in calorifiers? We will tell you exactly why :

- ❖ In both industrial and commercial settings, hot water can be required at any time. Calorifiers help you store hot water, making it instantaneously available as and when required.
- ❖ The design of the products are planned in a way that requires minimum space.
- ❖ The maintenance and repair of our calorifiers have been made extremely easy.

HMS is the most prominent name when it comes to calorifier suppliers in UAE. We deal with a wide range of calorifiers for commercial as well as industrial purposes

## Our Priority is **Quality**

Our calorifiers are designed in a way that prevents them from being subjected to any damage or corrosion. They are usually GI coated which increases the longevity of the product.

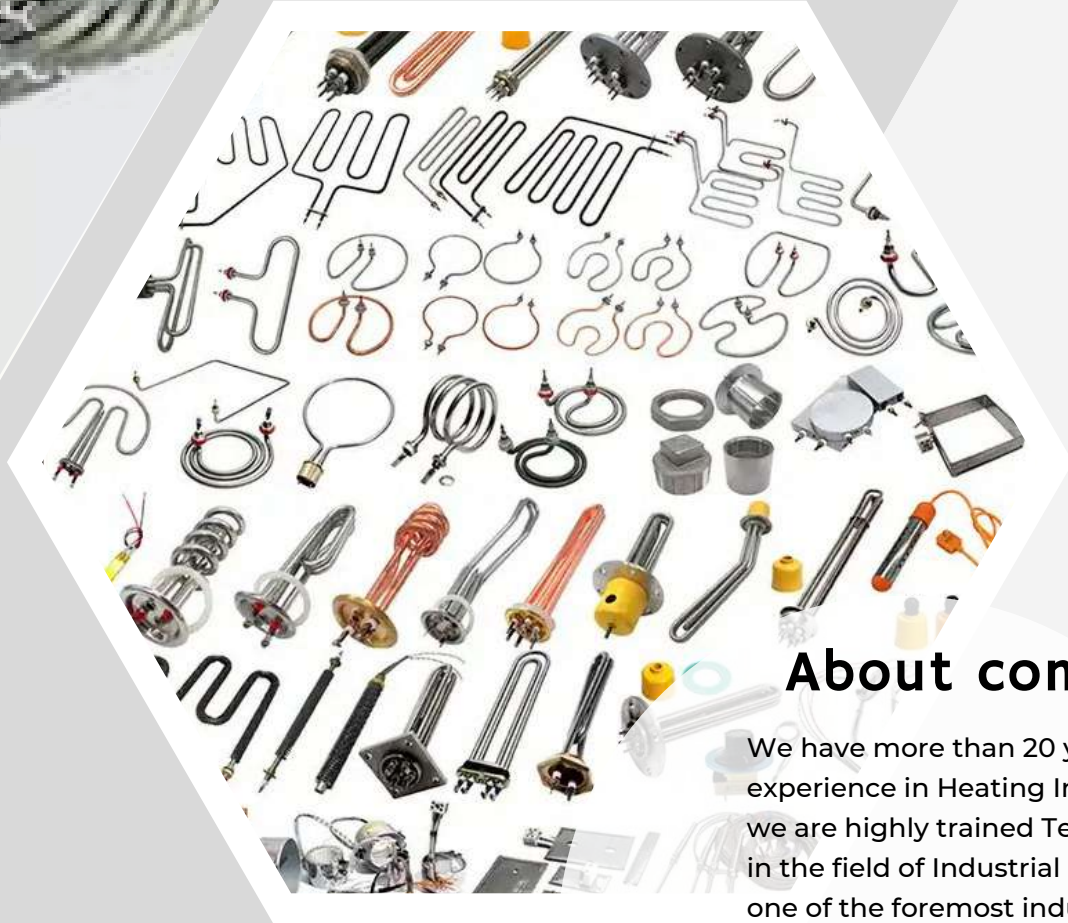

Our calorifiers are extremely user friendly. They are easy to operate and the maintenance cost is bare minimum.

Our calorifiers are made of high grade materials that are robust and reliable.

Our calorifiers are weather resistant. We have incorporated a manufacturing style which protects the calorifiers from all harsh climate conditions.

Our calorifiers are up to date when it comes to safety. We perform regular system acceptance tests to add as many safety protocols as possible, thereby maintaining the standard of our products.

## About company

We have more than 20 years of experience in Heating Industries and we are highly trained Technical experts in the field of Industrial heaters, being one of the foremost industry leaders in Gulf. Heating plays a very integral role in the field of process engineering to reach mission targets of specific applications. Keeping this in mind, experienced professionals on the board of this heating engineering solutions have formulated a team of professionals to spearhead the manufacturing of vital heating products and services.

Today, with over 20 years of experience, HMS offers the most comprehensive and diversified heating engineering solutions and technology, thus making itself a name in this niche market and making it the most sought after organization for its expertise. It is with confidence that HMS Heaters boosts of the fastest turn-around time for heating manufacturing and delivery in the GULF.

Our products work to increase energy efficiency and environmental protection through innovation in infrared heat manufacturing supplier technologies. HMS are dedicated to building long term business relationships through deliverance of cutting edge quality service, products and its relative rich expertise. The principle goal of HMS is to become the entire Gulf region premier of heating solution providers, specially to every organization which has engineering needs for heat manufacturing requirements, thus partnering and ensuring the fulfillment of their targeted specified completion of their end product.

## Our Product

## WHY CUSTOMERS PREFER HMS'S HEATERS?

- Total Quality Management with negligible Rejection Rate
- Instant Response and Minimum Lead Time
- Local Manufacturing facilitates to avoid supply chain disruptions
- Savings on Freight and forwarding charges
- Manufactured as per Gulf Standards

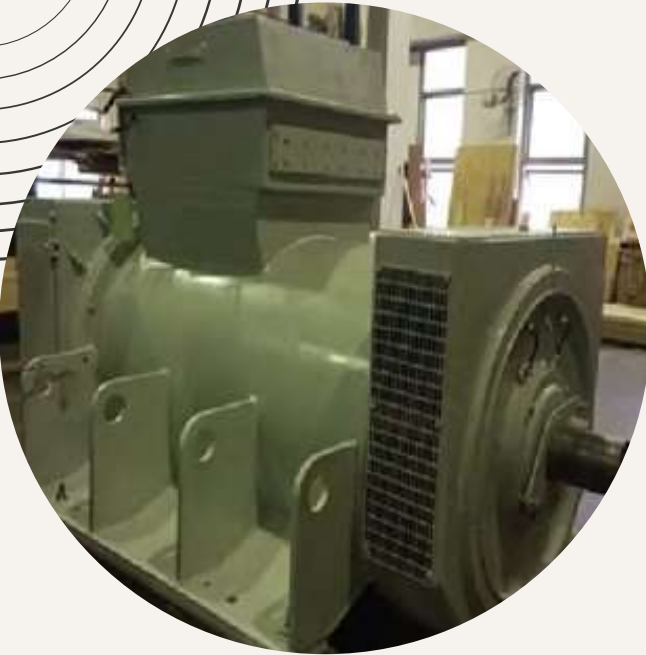

# ALTERNATOR/ MOTOR REWINDING & SERVICING

Alternator rewinding, more commonly referred to as generator rewinding, is the rewinding of the stator. The stator is required to be rewound throughout the lifespan of your alternator. Various factors can affect its maintenance schedule but first, let us examine how this process works.

Figuring out the winding data  
Before the rewinding process can begin, the engineers have to ascertain the winding data of the stator. Various data, such as the wire size, types of connection and turns per coil, have to be extracted from the motor so the engineers can replicate the performance of the original alternator and look for areas to improve its performance.

q2. Burning the stator and stripping out the core  
qAfter the critical data are extracted, the stator is placed in an oven and exposed to extreme temperatures for further testing. Once it is sufficiently cooled down, the core's windings are stripped out so the engineers can insert a new set of coils into the stator.

Our alternator servicing ensures the efficient operation of your power generation equipment. With a focus on reliability and performance, we provide comprehensive maintenance and servicing to keep your alternators running at their best, minimizing downtime and maximizing output."

## ALTERNATOR Rewinding

- Our alternator rewinding services are dedicated to restoring the heart of your power generation systems. With a blend of expertise and quality, we'll rewind and rejuvenate your alternators, ensuring they deliver the reliable energy production your operations demand."
- Remember to customize this quotation with specific details, such as alternator specifications, pricing, and terms, to align with your business or customer's needs.

## ALTERNATOR OverHauling

Our alternator overhauling services are dedicated to breathing new life into your power generation equipment. With a focus on precision and quality, we offer a comprehensive overhaul to ensure your alternators function at peak performance, delivering reliable power when you need it most.
