MATTER MIND

PERFECTION IS A STATE OF MIND

WHO WE ARE

Our company was founded with the core need of helping people fulfill a choice of having their dream commercial structures.

We have started our new adventure as an interior designing firm where we explore the various aspects and infinite possibilities of interiors, architecture, and design. A building is only as good as its interiors and we ardently believe that we can design the interiors of your work space. Whether it is an office, restaurant, or studio, we will make sure it looks exactly like how you pictured it.

We are a recognized firm that solely focuses on designing unique, aesthetically pleasing, and most of all functional interiors that are incorporated by the authenticity of the traditional and the modern. We have everything you need and more for your workspace, including end-to-end interiors complete with decor, furniture, renovations, and modular solutions. We mainly focus on restaurant interior fit outs so that our clients can provide their customers with elite fine dining experience. We are committed to aiding you in decorating and customizing your space in any way you desire while keeping it functional and visually appealing. We dedicate our time to transforming the lives of our clients by creating a space uniquely for you, that reflects your personality, aesthetic preferences, family history, and way of life.

OUR VISION

Our vision is to grow by providing services that attract satisfaction and help us on the path to being a large establishment. Our unwavering commitment to quality, service, and client advocacy shows how passionate we are about our work.

OUR MISSION

Our mission is to go above and beyond using our outstanding craftsmanship, industry knowledge, and years of experience to pay attention to intricate details, and the complete guarantee of client satisfaction.

INTERIOR DESIGN

We provide unique and original interior design for your workspace that embodies your personality and necessities. Our creations are visually pleasing as well as functional. In order for the business to conduct its operations, the design of these spaces that we design guarantees maximum functionality and security. Our services include excellent and top-quality interior fit-outs, especially for restaurants and other hospitality establishments.

INTERIOR FIT-OUT

We will make sure that your commercial structure is suitable for you to comfortably settle into your workspace that is made to be occupational. The electrical, and mechanical duties will be taken care off and your space is made to have the best use out of it. We promise to create the best interior for your guests and customers for our clients who indulge in the hospitality department. We ensure that the layout for your restaurant is top notch and it is fully functional for the staff as well as the clients and that the space allows for free movement.

ELECTRO MECHANICAL

We undertake the end-to-end interior design of your space. Our services include taking over the electro-mechanical responsibilities and getting them done so that you have nothing to worry about and your space has the most functionality.

RAISED FLOORING

Depending on your need, raised flooring might be necessary. In order to create a concealed space for the passage of mechanical and electrical services, a raised floor elevates the structural floor over a solid base. We can do that in the most convenient and functional way.

JOINERY

A work space is never complete without excellent woodwork. Joineries can add a touch of elegance to your commercial structure. Our joinery services are top-tier and make your space ten times more functional and aesthetically pleasing.

LIGHTING

Our Lighting services are of high quality. Great lighting is what is going to set your work space apart from others. Lighting is capable of creating more depth and beauty in the room as well as drawing attention to the most amazing aspects of your building. Our architectural lighting is created with a clever combination of lighting skillfully concealed within the joinery or the architecture of the space.

FLOORING

The key to a comfortable home is the flooring of it. Flooring is an integral part of the interiors of your dream space that has the capability of making or breaking your work space. Flooring plays a major part in choosing the right restaurant interior fit outs as well. We make sure that your flooring is aligned with the rest of the architecture and that the right patterns are selected in order to create a flawless interior.

WALL COVERING

The wall covering is a trending topic when it comes to interior design. Wall coverings can be used to decorate your walls as well as protect them. However, it is important to choose the correct wall covering for your space. We can help you choose coverings that are perfect for the architecture of your home.

OFFICE FURNITURE

Your workspace can only be completely functional if you have the right office equipment. These office furnishings that may be used independently and don't need to be assembled from separate sections are referred to as free-standing office furniture. The type of office furniture you need will solely be based on the nature of the business you are involved in. We can aid you by picking out office furniture that is made to last.

EDUCATIONAL FURNITURE

In the end-to-end services we provide, educational furniture is one of them. Good classroom furnishing will include furniture that fits the student and allows movement and is ergonomically correct. We can help you build classrooms that are relaxing and comfortable.

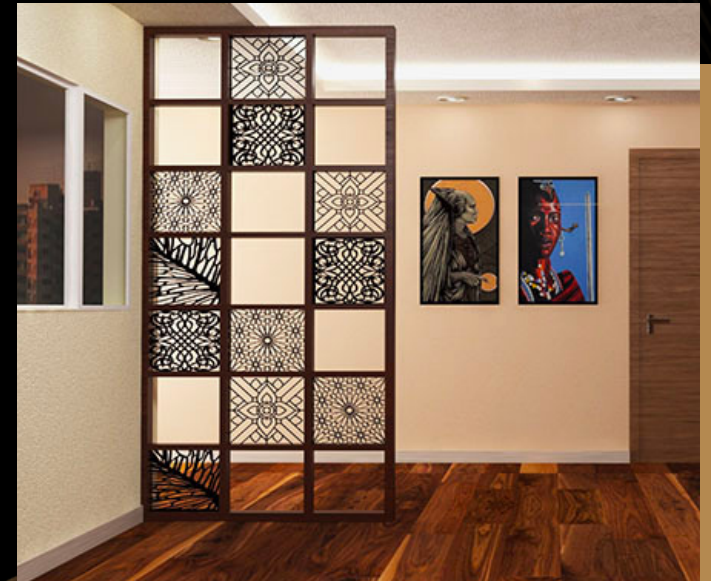

ACOUSTIC

When it comes to interior designing, acoustics play a major role in it in terms of how cozy and comfortable the inside of a room is. For effective noise reduction, the acoustics of the room must be altered or controlled. To shorten the duration that sounds reverberate, minimize noise, and improve voice clarity, this procedure uses acoustic panels in the walls and floor treatments. And we can promise you that your home will never be acoustically inconvenient.

PARTITION

Non-load-bearing partitions are the walls that divide rooms in structures. While they may have a secondary structural function, such as supporting cabinets or shelving, they solely serve to support themselves structurally and do not support or transfer principal loads from other elements of the building. And we can promise you the most structurally sound and visually appealing partitions for your place.

CLIENTS TESTIMONIALS

“

Collaborating with Matter Mind has been truly seamless. Their expertise, attention to detail, and deep understanding of our vision have consistently stood out. Their professionalism and ease of working together make every project a delightful experience. We highly recommend Matter Mind for any endeavor. Their ability to bring our ideas to life and their commitment to excellence set them apart in the field of restaurant fit outs.

Naseem Abdul Khader

Al Rumooz Central Kitchen Equipment Installation LLC

“

Matter Mind truly exceeded our expectations with their impeccable execution of the full fit-out project of our new restaurant at Khalidiyah Mall. Their professionalism, creative approach, and timely completion showcased their commitment. The team's attention to detail and dedication to bringing our vision to life were remarkable. We're immensely pleased with the results and highly recommend Matter Mind for their exceptional services.

Haris Kunnumpurath

Tandooriya Dhaba

“

I wanted to take a moment to express my gratitude for the exemplary effort and dedication that you and your team put into completing our project (Gerard Cafe at Adnoc station - Ajman) successfully and efficiently. Your attention to detail, creativity, and design truly shone through every step of the way.
