Your Premier Choice for Marine, Offshore,
and Oilfield Needs.

We pride ourselves on our professional approach in serving the Marine, Offshore, and Oilfield industries.

WELCOME

**MANUFACTURING TAKES
CRAFT TO THE NEXT LEVEL**

Discover top-quality Oilfield Supplies and Offshore solutions at AHS . Our diverse range of products, including offshore rigs, bearings, and essential chemicals, is designed to cater to the oil and gas industry's needs. Backed by skilled oilfield contractors and marine fabricators, we ensure seamless project execution. Choose us as your trusted partner for excellence, reliability, and success in the oil and gas industry.

HEAVY EQUIPMENT AND MARINE SPARE PARTS

Welcome to our comprehensive backhoe access hub! At our warehouse, you can find the world's three most popular backhoes, and we offer over 10,000 references with a continuous focus on expanding our collection with new replacement parts. With a remarkable twelve years of experience in the sale of replacement spare parts, we take pride in providing exceptional technical support whenever you

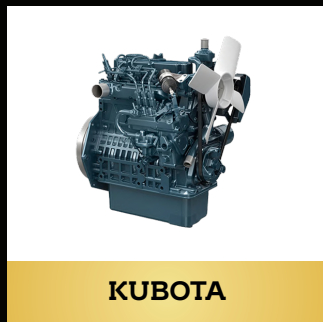

require assistance. Our team of knowledgeable traders not only sells parts but also possesses a deep understanding of their applications. These robust and powerful machines are essential for handling tasks that are beyond the capabilities of human labor. They are specifically engineered to provide the necessary strength and durability required to operate in challenging environments and handle heavy loads.

FILTERS

We offer wide range of filters for Automotive, Industrial, Earthmoving Equipments, Marine, Power generation and Oilfield sectors. We deal with well-known Brands OEM and OES manufacturers they produce high quality filters to the aftermarket. These devices are constructed with precision to ensure effective separation while maintaining the desired properties of the processed material. Whether it's purifying water, enhancing air quality, or refining industrial processes, filter equipment plays a vital role in ensuring optimal results. Each type tailored to specific

applications and industries. The goal of filter equipment is to enhance the quality, safety, and efficiency of processes by effectively removing unwanted elements and ensuring that the end product meets the desired standards.

V-BELTS & PULLEY

We also stock a wide range of polyurethane and rubber products, including industrial timing belts, Cogged V-belts, banded belts, flat belts, machine belts, V-ribbed belts, Automotive timing belts, double-sided timing belts, food conveyor belts, variable speed belts, and special coating belts for, Paper, packaging and glass industries. In

addition to our diverse inventory, we offer specialized solutions tailored to the needs of various industries. Our team is dedicated to providing reliable products and exceptional service to ensure your operational success. Moreover, we recognize that certain applications demand more than just standard solutions.

COMPRESSOR & SPARE PARTS

AHS Supplies the full range of compressors for today's industrial requirements. From time-tested, robust workhorses to advanced, sophisticated compressed air solutions, we offer an extensive product range. Compressors are fundamental components in various industries, including refrigeration, air conditioning, manufacturing, and energy production. They play a crucial role in numerous applications, from maintaining ideal

temperature conditions to powering pneumatic tools and equipment.

DRILLING SOLUTIONS OR EQUIPMENTS

Uncover unrivaled drilling solutions and state-of-the-art equipment, engineered for excellence across diverse industries. With powerful rigs, advanced bits, innovative mud systems, and safety - driven blowout preventers, our comprehensive range guarantees precision and performance. Effortlessly move from drilling to production using our completion

gear and attain precise soil insights through geotechnical tools. Whether resource exploration or sustainability is your focus, our specialized equipment and tunnel boring machines redefine potential. Elevate your projects – connect with us today for a drilling revolution.

COUPLINGS

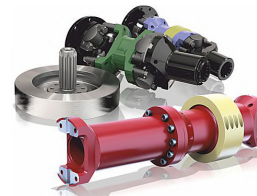

An organisation that manufactures and integrates all the diverse components of a drivetrain provides the experience to help you select the best component combination for your application. Simple coupling-bellhousing-pump combinations to mechanical drives for subsea wave energy, steel works crucible handling equipment or marine winch drives, jbj's team is recognised for its expertise in the selection and configuration of hydraulic and mechanical transmission systems. Able to draw on an extensive product range that provides the building blocks for bespoke systems both large and small, the in-house design team offers a complete service, ranging from assessment of customer requirements to full technical backup, including product specification, CAD based system design, system build and certification

BEARINGS

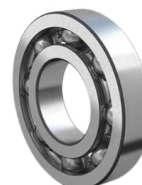

AHS's comprehensive inventory of OEM bearing products, combined with our responsive customer service, positions us as a go-to destination for businesses seeking reliable and high performance bearings. Whether for industrial applications requiring robust and efficient components or automotive solutions demanding precision and durability, AHS stands ready to deliver the right bearings for the job. In essence, our journey from a local player to a global leader in the bearings industry showcases our dedication to quality, adaptability to market dynamics, and unyielding commitment to customer satisfaction. Guided by a commitment to staying up-to-date with industry advancements, AHS continually seeks out the latest innovations and technologies in the bearing sector.

Utilizing our broad network of suppliers, we possess the capability to procure a wide range of nuts, bolts, screws, and specialized fasteners tailored to your requirements. Our unwavering commitment to quality and exceptionally competitive pricing remains a hallmark of our services. Furthermore, our influence extends to various sectors, including critical industries like Oilfield and Marine applications, where the imperative of corrosion-resistant fastening is of paramount importance. Our comprehensive fastener sourcing, unwavering quality assurance, and commitment to meeting industry-specific demands make us a dependable choice across sectors, particularly in critical areas like Oilfield and Marine applications.

VALVES, PIPES & FITTINGS

Pipes and fittings play a crucial role in (AHS) by facilitating the smooth and efficient flow of materials and substances within the automated processes. AHS involves the use of conveyor systems, pneumatic tubes, and other automated transport mechanisms to move materials from one point to another in industries like manufacturing, distribution, and warehousing. In AHS applications, pipes and fittings are selected based on the specific requirements of the materials

being transported and the overall system design. They must be durable, corrosion-resistant, and capable of withstanding the pressures and forces exerted by the automated handling equipment. Additionally, the fittings need to be carefully designed to ensure seamless connections and prevent leaks, which could disrupt the automated flow and compromise the safety of the system.

SAFETY EQUIPMENTS

AHS plays a vital role in ensuring the protection of workers and the efficient functioning of automated processes. AHS involves the use of advanced robotics, conveyor systems, and material handling machinery, which can present unique safety challenges. One of the key safety considerations in AHS is the use of safety barriers and interlocks. Physical barriers, such as fencing and gates, are installed around automated equipment to prevent unauthorized access and protect workers from moving parts. Interlocks ensure that the machinery stops automatically when a barrier is opened or breached, reducing the risk of accidents. Safety scanners and cameras are essential components of AHS safety equipment. These devices continuously monitor the work area and detect the presence of personnel or objects, prompting the system to slow down or stop to avoid collisions and accidents.

HAND TOOLS AND HARDWARE MATERIAL

We supplies tools and light machinery required in industries such as Shipping, Oil & Gas, Construction, Power Supply and General Maintenance. We aim to provide our customers with great quality products and an amazing business experience to forge long-lasting relationships. we prioritize quality and safety. All our hardware and hand tool materials undergo stringent quality checks, adhering to industry standards, and regulations. This commitment ensures that you receive materials that meet and exceed your expectations, providing peace of mind during every project. Hand tools and hardware materials refer to a wide range of manual instruments and physical components used for tasks such as maintenance, and various applications requiring manual manipulation.

WELDING PRODUCTS

Welcome to AHS Welding Products, your ultimate destination for high-quality welding solutions that empower welders of all levels to create with precision, efficiency, and confidence. At AHS, we're not just a supplier; we're your partner in welding excellence. AHS Welding Products was born out of a genuine passion for welding and a vision to provide the welding community with exceptional tools and products. Our journey started with a simple goal: to make high-quality

welding equipment and supplies accessible to welders, from hobbyists to industry professionals. Our mission is to be your reliable companion in your welding journey, offering a range of products that elevate your skills and projects. We understand that welding is a blend of artistry and science, and we're dedicated to delivering products that help you master both aspects. At AHS, your success is our inspiration.

LIFTING EQUIPMENTS

At AHS Lifting Equipments, we are dedicated to providing high-quality lifting solutions that enhance safety, efficiency, and productivity across various industries. With a strong commitment to innovation, reliability, and customer satisfaction, we have become a trusted name in the field of lifting equipment. Our mission is to revolutionize the lifting equipment industry by delivering cutting-edge solutions that meet the evolving needs of our clients. We aim to set new

standards for safety and performance while ensuring that our products contribute to a safer working environment for all. With years of industry experience, our team of experts possesses an in-depth understanding of lifting equipment technologies, regulations, and best practices. This knowledge enables us to design, manufacture, and supply lifting solutions that not only adhere to industry standards but also exceed expectations.

AHS Lubricants is a leading provider of high-quality lubrication solutions for a wide range of industries. With a focus on innovation, performance, and sustainability, we are dedicated to delivering lubricants that enhance the efficiency, reliability, & longevity of your machinery & equipment. Our mission is to be the preferred choice for lubricants by offering superior products that optimize the performance of industrial machinery while minimizing environmental impact. We aim to be a trusted partner in extending the lifespan of equipment, reducing maintenance costs, & promoting sustainable practices. Backed by a team of experts with extensive knowledge in lubrication technology, we constantly strive to innovate and develop lubricants that meet the evolving needs of modern industries. Our research and development efforts are geared towards creating advanced formulas that can withstand extreme conditions, reduce friction, and prevent wear and tear.
