TANKER FITTINGS

We Provide tanker fittings that required for the proper working of the tanker,All fittings are available at our store.

FLOW METERS

A flow meter is a device that measures how much liquid or gas moves through a pipeline in a given period of time. By measuring flow rates, flow meters provide crucial visibility into what's flowing where, within pipes, drainage systems, and other types of infrastructure.

ALL TYPE OF HOSES

We provide all types of hoses which can used in the oil field projects.

HOSE REEL

spring retractable fuel delivery reels incorporate metal forms to insure the greatest possible strength and are ideal for mobile applications. These rugged, Hose reels are suitable for a wide variety of fuel applications. Reels are supplied with different type of swivels as per customer choice.

FUEL NOZZLES

Fueling nozzles are components that attach to either the fuel source or the receiving tank to permit the transfer of liquid or gaseous fuels. .

FUEL FILTERS

A fuel filter is a filter in a fuel line that screens out dirt and rust particles from the fuel, and is normally made into cartridges containing a filter paper.

CAMLOCK FITTINGS

Camlock fittings—also called cam and groove couplings—are sturdy connectors used to join hoses or pipes.

HYDRAULIC FITTINGS

Hydraulic Fittings are used to connect a hydraulic hose to components like hydraulic cylinders, pipes, tubes, or different types of hydraulic hoses.

PNEUMATIC FITTINGS

Pneumatic fittings, also called compressed air connectors, are an important component in pneumatic connection technology. And there is a matching fitting for every pneumatic tube.

GENERAL HARDWARES

We also provide general hardware items that can be used for various job purposes.
