STRETCH FILM ROLL

Known as stretch wrap, pallet wrap, or stretch film this highly elastic plastic film is wrapped around loads to provide stability during movement. The elastic recovery of the film keeps the items tightly bound together. Additionally, stretch film offers your loads a measure of tamper evidence and protection from the elements. Stretch film is manufactured by adding different chemical mixtures to the base polyethylene material features that result in memory, strength and cling. Whether applying stretch film by hand or with a stretch wrap machine, we have you covered.

CUSTOMIZATION IS POSSIBLE

We can produce this PP-strap printed with your logo and / or company details.

POF SHRINK FILM

Shrink film or shrink wrap, as its frequently referred to in the packaging industry, is a thin film manufactured from a plastic based material. It's generally used to wrap up a wide variety of products with reverse shapes, sizes and weights, due to its high level of transparency and clarity. Shrink wrap brings sales appeal distinction to your products. The shrink wrapping process involves using a shrink wrap roll in combination with shrink wrap equipment. The equipment can be as simple as a hand held, single bar sealer, an industrial grade blow dryer or a sophisticated semi-automatic or fully automatic machine.

CORRUGATED & PAPER ROLLS

Corrugated cardboard on a roll is also called frosting cardboard. This is the ideal product for the protection of the products during transport and / or changing weather conditions. The folded one-sided corrugated cardboard folds in both directions. It is made of gray / brown micro-corrugated cardboard and has a special structure with transposed rills. Because of this the cardboard easily folds and quickly absorbs the shape of the products. The corrugated cardboard on a roll is available from stock in various sizes.

BUBBLE ROLL

Bubble wrap is made from polyethylene and is commonly used for packing delicate things. The bubbles in the material are evenly spaced thus providing firm cushioning on precious and fragile items. These are available in different sizes and are great for wrapping glassware, picture frames, mirrors, electronics, and collectibles

MASKING TAPE

Produced for high performance applications, Our Masking Tape is made with semi-saturated crepe paper and natural latex rubber-based adhesives because it provides the highest adhesion. With the ability to with stand medium to high temperatures, our tape is made for commercial purposes such as metal preparations, coatings and paintings, electronics, manufacturing door frames and wall industry.

Sizes Available : 1", 1.5", 2"

BOPP TAPE

Clear Tapes: ARABIAN PACK Tapes clear tapes offer vibrant options for packaging, combining visibility with a clean, transparent finish. Additionally, our clear tapes also come in golden yellowish and lemon yellowish colors, providing even more vibrant choices for your packaging needs

Brown Tape: This variant from ARABIAN PACK Tape exhibits robust durability and reliable adhesion, well-suited for securing heavier packages and shipments with ease.

PACKING CARTOON

Choose the right shipping boxes and packaging materials for optimal protection. Our durable and versatile corrugated boxes come in single wall, double wall, and triple wall options, providing increasing support for various materials. Made from high-grade Kraft liners, our cartons offer a high strength-to-weight ratio, ensuring maximum compression and bursting strength. Shop online at Areen Pack for quality shipping supplies that safeguard your products from rough handling and transit risks. Our cartons, sheets, and rolls are biodegradable, recyclable, and eco-friendly.

POLYETHYLENE VAPOR

Poliane is a polyethylene vapor barrier to alkalis, salts, acids and chemicals found in sub-soils. Poliane is a fully stable and waterproof polyethylene vapor barrier to alkalis, salts, acids and chemicals found in sub-soils, manufactured according to BS 312:1970 fully stable and waterproof

PP & PET STRAP

For the strapping and/or bundling of your products you can use PP strap. This is also called strapping tape. We can deliver this product for mechanical and manual use. This PP strap is very easy to use in combination with a tensioner and buckles, The sturdy material will not break easily. Colors are available on request. We can deliver this strap in different sizes.

COMPOSITE STRAP

Our Composite Cord Strap, the latest advancement in strapping technology. Crafted from high tenacity polyester fibers coated with clear polypropylene, this innovative strap offers enhanced water resistance and improved bundling properties. Its polymer coating ensures durability and strength, making it ideal for threading under pallets and through metal buckles. Available in a wide range of widths and strengths, our Composite Cord Strap is designed to meet your diverse packaging needs.

STRAP BUCKLE

METAL WIRE BUCKLE

- Durable Finish
- Robustness
- High Strength
- Size: Standard
- Usage: Packing Industry and Cargo

PUSH ON BUCKLE

- Strapping Seal
- Seal Type Open
- Material Steel
- Joint Type Single,
- Double Notch

DUCT TAPES

Duct tapes are used in the HVAC (Heat, Ventilation, & Air-Conditioning), plumbing, and general contracting space where heavy bundling, wrapping, and air-sealing, are required. The tapes are also used on metal sheets for sealing and to seal air gaps, such as as in air-conditioning systems.

The tape is made of three different layers each with distinctive properties. The top layer is a polyethylene film that prevents the accumulation of moisture from seeping in. The middle layer is made of a mesh cloth that is easily torn, but also provides high tensile strength. The bottom layer is the adhesive which is natural rubber and super tacky to provide an instant aggressive seal on both regular, and irregular, surfaces.

PACKING PAPER

Protect your valuable items during a move with our high-quality packing paper. Made from lightweight and recyclable material, this packing paper is designed to fit the contour of fragile objects such as glasses, dishes, mirrors, and plates, providing excellent cushioning and preventing breakage. It is also ideal for wrapping small to medium-sized items like electronics, appliances, and collectibles. With its absorbent and scratch-resistant qualities, our packing paper ensures the safety and preservation of your belongings. Trust in our packing paper for a hassle-free and secure moving experience.

CORRUGATED SHEET

Our corrugated sheet is a versatile and reliable packaging material, available in 3-ply and 5-ply options. Crafted from layers of paper, it provides enhanced strength for shipping heavy products. Lightweight and cost-effective, it is perfect for packing furniture, engineering items, spare parts, books, toys, and fragile items. With excellent cushioning and shock absorption, our corrugated sheet ensures safe packaging in any shape. Trust our environmentally responsible and recyclable corrugated sheet for all your packaging needs.

FOAM ROLL

Our foam wrap rolls provide ultimate protection for fragile items. With a smooth surface, exceptional durability, and lightweight design, they offer excellent sealing properties and great rigidity. These rolls create a reliable barrier against air, dust, and water migration, ensuring the safety and security of your items. UV and Oxone resistance, along with good chemical resistance, make them perfect for thermal insulation, exterior applications, and packaging solutions. Whether you need to protect delicate artifacts or provide cushioning for books and prints, our shock-absorbing foam is the ideal choice. Available in various densities and colors,
