BOPP CLEAR, BROWN & COLORED TAPE

BOPP is Biaxially Oriented Polypropylene (BOPP) Film coated with water based adhesive and Our adhesive tapes are made from superior quality adhesive, which provides high tack and adhesion strength required for sealing of cartons to make them pilfer proof.

1. Ideal for Light weight packaging,
2. Re-Inforcing
3. Laminating,
4. Label Protection,
5. Bundling

Colors available : Brown and Transparent

Advantage of BOPP Tapes

Strong grip due to excellent adhesive backing
Uniform coating process | Durable. Long shelf life

MASKING TAPE

Produced for high performance applications, Our Masking Tape is made with semi-saturated crepe paper and natural latex rubber-based adhesives because it provides the highest adhesion. With the ability to withstand medium to high temperatures, our tape is made for commercial purposes such as metal preparations, coatings and paintings, electronics, manufacturing door frames and wall industry.

Sizes Available: 1",1.5",2"

FRAGILE AND SPECIAL OFFER TAPE

Fragile Tape pre-printed tape to catch attention of security and shipping instruction. Special offer tape grabs attention to highlight discounted prices mostly in supermarkets and hypermarkets.

AREEN PACK

ALUMINIUM FOIL TAPE

Aluminium Foil Tape is a super performance, professional grade foil tape using dead soft aluminum foil with an aggressive solvent acrylic adhesive. Foil tapes are used mostly in the HVAC (Heat, Ventilation, & Air-Conditioning) industry to seal of vapor in ducting systems, or for thermal conductivity, moisture and chemical resistance, and heat and light reflectance. The tape is used ideally for sealing joints, seams against moisture and vapor on foil jacketing insulation. The tape is suitable for many other permanent sealing, holding, splicing or masking applications requiring the protection offered by a foil backing.

DUCT TAPE

Duct tapes are used in the HVAC (Heat, Ventilation, & Air-Conditioning), plumbing, and general contracting space where heavy bundling, wrapping, and air-sealing, are required. The tapes are also used on metal sheets for sealing and to seal air gaps, such as as in air-conditioning systems.

The tape is made of three different layers each with distinctive properties. The top layer is a polyethylene film that prevents the accumulation of moisture from seeping in. The middle layer is made of a mesh cloth that is easily torn, but also provides high tensile strength. The bottom layer is the adhesive which is natural rubber and super tacky to provide an instant aggressive seal on both regular, and irregular, surfaces.

PP & SET STRAP

For the strapping and / or bundling of your products you can use PP strap. This is also called strapping tape. We can deliver this product for mechanical and manual use. This PP strap is very easy to use in combination with a tensioner and buckles, The sturdy material will not break easily. Colors are available on request. We can deliver this strap in different sizes.

CUSTOMIZATION IS POSSIBLE

We can produce this PP-strap printed with your logo and / or company details.

POF SHRINK FILM

Shrink film or shrink wrap, as its frequently referred to in the packaging industry, is a thin film manufactured from a plastic based material. It's generally used to wrap up a wide variety of products with reverse shapes, sizes and weights, due to its high level of transparency and clarity. Shrink wrap brings sales appeal distinction to your products. The shrink wrapping process involves using a shrink wrap roll in combination with shrink wrap equipment. The equipment can be as simple as a hand held, single bar sealer, an industrial grade blow dryer or a sophisticated semi-automatic or fully automatic machine.

STRETCH FILM ROLL

Known as stretch wrap , pallet wrap, or stretch film this highly elastic plastic film is wrapped around loads to provide stability during movement. The elastic recovery of the film keeps the items tightly bound together. Additionally, stretch film offers your loads a measure of tamper evidence and protection from the elements. Stretch film is manufactured by adding different chemical mixtures to the base polyethylene material features that result in memory, strength and cling. Whether applying stretch film by hand or with a stretch wrap machine, we have you covered.

WOVEN CARGO BAG (BLACK & WHITE)

Our woven sacks have been designed especially for heavy-duty use, and are ideal for using in transit and as packaging for heavy items such as parcels, mail ETC

These bags are incredibly strong and hard-wearing so can be re-used over and over again. The sacks also have a stitched seam which is typically associated with heavy-duty packaging products, due to its ability to hold the product together under weight and pressure.

The sacks are white in colour and come in three different sizes to suit various applications. The largest size we carry, which is 24 x 40 inches, is favoured by the building industry. The sacks come in quantities of 100 per pack, and because of the bags industrial application these bags do not have an adhesive seal, and need to be closed using cable ties or staples.

STRAP BUCKLE

METAL WIRE BUCKLE

- Durable finish
- Robustness
- High strength
- Size: Standard
- Usage: packing industry and cargo

PUSH ON BUCKLE

- Strapping Seal
- Seal Type Open
- Material Steel
- Joint Type Single, Double Notch

PP STRING

We generate this PP string, usually resilient in addition to smooth. It truly is smooth accommodating suited to generating tie up chain for hawker work with. Will come in different colours.

CORRUGATED & PAPER ROLLS

Corrugated cardboard on a roll is also called frosting cardboard. This is the ideal product for the protection of the products during transport and / or changing weather conditions. The folded one-sided corrugated cardboard folds in both directions. It is made of gray / brown micro-corrugated cardboard and has a special structure with transposed rills. Because of this the cardboard easily folds and quickly absorbs the shape of the products. The corrugated cardboard on a roll is available from stock in various sizes.

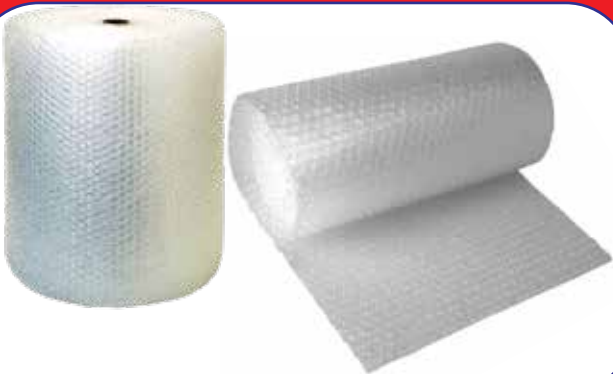

PACKAGING CARTOON

Choosing the right shipping boxes and packaging materials can make all the difference. Our durable & versatile corrugated boxes, i.e., the brown cartons come in single wall, double wall and triple wall. Each providing more support as the layers increases and offering you options to ship variety of materials. A more premium looking box is the white corrugated boxes.

All our cartons are made from the very high grade Kraft liners to providing a high strength-to-weight ratio and imparting maximum compression and bursting strength. Buy quality shipping supplies online from Areen Pack and rest assured that your products will be safe from the hazards of rough handling and other risks involved in transit. The cartons category offers a truly vast range of sizes. As always all our cartons, sheets and rolls are 100 % biodegradable, recyclable and thus sustainable and eco-friendly.

BUBBLE ROLL

Bubble wrap is made from polyethylene and is commonly used for packing delicate things. The bubbles in the material are evenly spaced thus providing firm cushioning on precious and fragile items. These are available in different sizes and are great for wrapping glassware, picture frames, mirrors, electronics, and collectibles.
