

Aluminium & Glass Work

Company Profile

AL ITAAR AL ZUJAJI ALUMINIUM & GLASS IND. LLC
SOLE PROPRIETORSHIP

www.aiazalumglass.com

INTRODUCTION

Al Itaar Al Zujaji Specializing in Aluminium and Glass Components of exceptional good quality.

Our Team is highly qualified leaders of Engineers, Designers, Foreman, Workers,who arrived with extensive experience in Aluminum facade works, Installation of Facade systems covering Engineering & Project Management.

Our Team successfully completed Involving some prestigious projects in Aluminium glazing and Aluminium cladding work. This includes conventional curtain wall, windows, doors,Skylight and Shop fronts.

We customize designs and undertake manufacturing of these items, as per the clients requirements.

Our factory is equipped with the most modern production systems resulting in high precision outputs and confirms to all specified standards including green buildings.

Our organization is a dynamic and flexible enabling a close coordination of engineering execution and quality.

We are able to provide best possible solution for existing and new buildings interior and exterior applications for a completely new look.

OUR VISION

To be the region's most professional and valued technical service provider.

Our vision is to be the best Architectural facade specialist.

Having a clear vision of our customer's requirements & to advise them in what is feasible.

MISSION STATEMENT

To establish long- term, mutually rewarding relationships with each of our clients by gaining their trust through dedicated performance. Our mission is to provide high quality architectural façade solution, Outstanding services at a competitive price that exceed our client's expectation.

Ensuring that customers' orders are completed & delivered on time.

Ensuring that our products & service meet regulatory standards & best practices with all customer's requirements.

Offering a comprehensive range of materials, finishes & solution that satisfy customers aspirations.

To maintain good standards, we provide quality products and service (that are of high quality) and do continuous research on what is happening in the industry to stay competitive.

OUR QUALITY POLICY

Al Itaar Al Zujaji is committed to achieve a sustained, profitable growth by developing and delivering quality products in the field of architectural aluminum and glazing works that consistently satisfy the need and expectations of our clients.

We also ensure that our products are fully compliant to local and relevant international statutory and regulatory requirements.

The total quality approach is the most important factor in the company's mission.

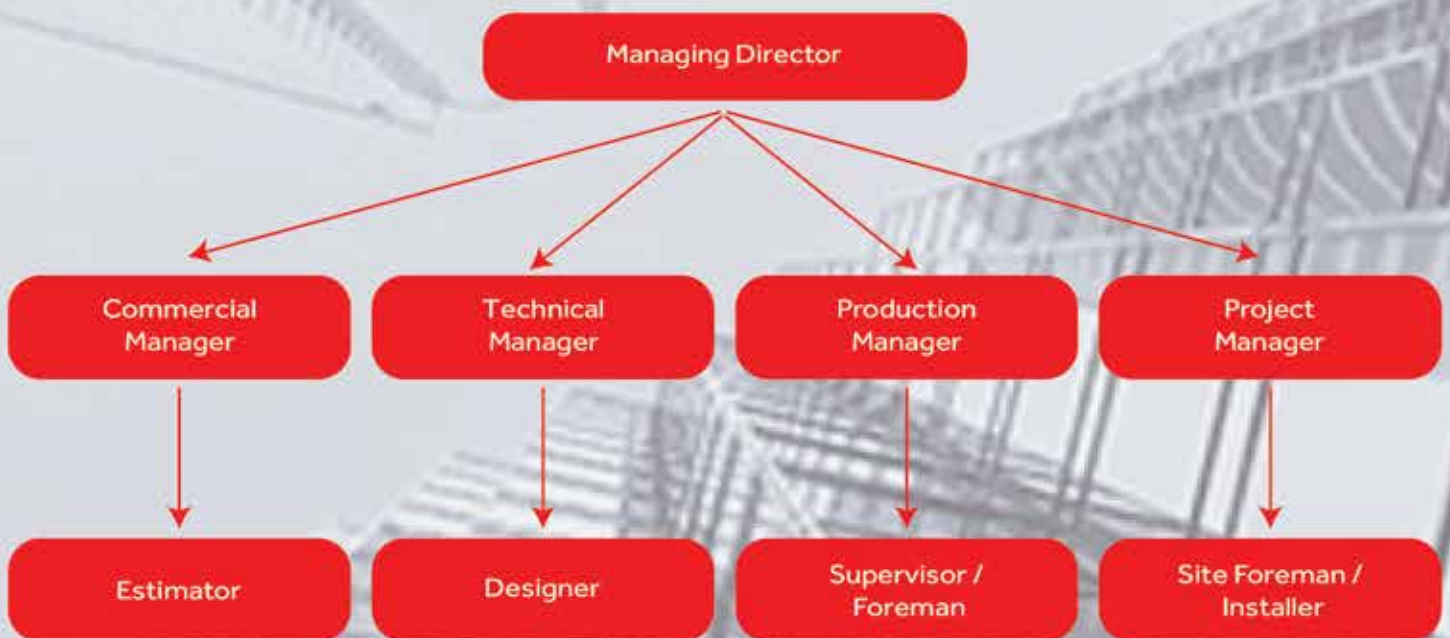

Keeping up to the changing market needs by eliminating compromises in process

and product quality is the bench marking factor in the success of the worldwide

recognized building projects with the company.

OUR TEAM

Our Team is assembled by experienced members in the field of specialization, who always actively and positively take initiative in most organized and logical way to get the work done. Each team-mate is expertise and comes forward with creative solution to the problem.

OUR SCOPE OF WORK

The company has taken the stand to grow continuously with the market as well as with their client base and render the following products & services:

- Quantity Survey
- Estimation for tendering
- Tender Drawing (2D/3D)
- Concept drawing (2D/3D)
- Shop drawing (2D/3D)
- Material Take off
- Fabrication drawing
- As Built drawing
- Structural Calculation
- BIM services -Façade Modelling (LOD 100 to LOD 500)
- Fabrication
- Installation

SPECIALIZED AREAS OF WORK

We are providing different types of products, mainly purchased locally and internationally from the manufacturers who have reliable guarantee system and high quality control on the raw material. Our client's satisfaction results from the strict quality assurance of the products.

- Stick Curtain wall- Conventional & Non-Conventional types
- Aluminium Composite Panel Cladding
- Skylights Balustrade & Handrails
- Swing Doors
- Hinged Doors
- Sliding Windows
- Hinged Windows
- Turn and Tilt Windows
- Arches
- Partitions
- False Ceilings
- Remote Control Automatic Doors
- Automatic Revolving Doors

Electrical Double Head Aluminum, Cutting Machines.

It is an electronic twin head cutting off machine with automatic transversing of the moving cutting head. Its characteristics are NC control, two carbide tipped blades, two full pneumatic clamps, roller conveyer and profile support system.

Air filter

Description -HF for high pressure system(40 bar). This filter, by means of impact, interception & coalescing principles, compels the submicronic liquid particles, which from the inside strain through the element, to collide & thus become larger micro droplets, which will drip the bottom of the filter housing.

Description -QF for the high pressure system (40 bar). Prefilter suitable for the removal of solid particles down to 5 micron including liquids, emulsions & oil particles. The strong mechanical resistance makes this filter the ideal initial protection of a compressed air system to retain impurities & for example, it is suitable as a postfilter for absorption dryers.

Bench Stand Drill

It has maximum capacity 32mm. spindle travel 120 mm, swing 515 mm and speed range 110-2880 rpm.

Single Head Aluminum Cutting Machine

(manual). It has blade dia 400 mm and cutting angle 0 to 45 degree.

Air Dryer.

It has features such as Litre/min: 6.000, flow rate: 360 M3/H cm: 212, _bar: 14, _volt/PH/Hz: 230/1750 Power consumption: 0.90 kw.

Heavy Duty Pneumatic, copy router machine.

It has an easy to operate double handle, double copying template, adjustable routing height, heavy duty double pneumatic clamping system and safety electrical switch with emergency system.

Heavy Duty Pneumatic Air Drill

Joint crimping Machine

It is strong and reliable and made of cast iron. The main features are adjustable corner sizes, powerful double clamping system, adjustable crimping tools and controllable double pneumatic pedestal system.

Heavy Duty Pneumatic Air Screw driver

Loader & Unloader Table

Screw compressor.

It has features such as Air delivered 2.500 mE/min, cfm: 88.34, _pressure: 10 bars. Motor power: 25 Hp, _KW 18.5, _Noise: 67 dB(A), Power: 400V+5% Hz, weight: 280kg, DIM (LXWXH): 960 x 740 x 1090 mm.

Window Assembly Table

OUR ACTIVITIES

Curtain Wall

A curtain wall is defined as thin, usually aluminum-framed wall, containing in-fills of glass, metal panels, or thin stone. The framing is attached to the building structure and does not carry the floor or roof loads of the building.

ACP Cladding

Aluminium Composite Panels "ACP" is a building cladding material commonly used in internal and external wall systems for its light weight, durability and structural performance.

Sky Light

An opening in a house roof or ship's deck that is covered with translucent or transparent material and that is designed to admit light.

Aluminium Pergolas

A pergola is an outdoor structure usually made from aluminium or wood used to create an outdoor focal point as well as a central seating area for friends and family together. A pergola is usually designed with vertical posts to create a sleek and elegant outdoor living area

Glass Railings

Standoff glass railing is a system where the glass panels are secured with standoffs (round stainless steel cylinders). The glass has holes pre-drilled, it is leveled in place, and the standoffs secure the panel to the vertical face of the stair and floor system.

Bi-Folding Door

A folding door is a type of door which opens by folding back in sections or so-called panels. Folding doors are also known as 'bi-fold doors', in spite of them most often having more than two panels.

Ultra Slim Sliding Door

The ultra-slim framed range is the biggest sliding door system on the market and is virtually frameless with exceptionally slim sightlines from just 20mm, and sizes up to 29m².

ACP Canopy

Aluminium composite panels (ACP) is a revolutionary and versatile new decorative and roofing material which is widely used in residential and commercial applications.

Shower Door

Shower doors often seem as though they are one of the simplest features of any bathroom. They serve two functions: providing access to a watertight shower area and preventing water from escaping while the shower is in use.

Office Frameless Glass Partition

Glass Partition Walls and Office Dividers, Defined They allow a room to be opened up without sacrificing floor space or light diffusion, and can create a comfortable and practical office environment. Glass partitions are gaining popularity over traditional drywall panel systems.
