ABOUT US

As per our vast experience with more than 15 years in manufacturing & fabrication of Kitchen equipment's. Laywan Kitchen Industry LLC was established in 2008 with a view to modernize the kitchen industry in United Arab Emirates and Middle East. We are an leading industrial kitchen equipment company specializing in design, installation, custom fabrication, supply, and maintenance of food and beverage processing business environment. We are glad to introduce ourselves as one of the leading stainless steel fabricators and suppliers of kitchen equipment's in UAE and Middle East and we are dedicated in best quality of fabrication with promising finishing touch all according to the customer desire.

Our premium offers include tailor-made turnkey solutions, unparalleled technical expertise, unique creative concepts, impeccable design, high quality products, optimum workflow, safety, hassle-free agreements, and dependable after sales service. The Company was originally founded as a service and engineering company and has evolved to become a high quality food and beverage processing machinery and packaging supplier with a key emphasis on after - sales support. Our Experienced management team and highly skilled

staffs work in partnership with specially selected international suppliers to ensure our comprehensive product range meet client's expectations and is fully compliant with legislations.

We specialize in providing turnkey solutions that suit customer needs. We got customer back from project designing stage, construction, procurement and supply, custom fabrication, project management, as well as technical support and maintenance.

INSTALLATION

Our experienced installation and service team are certified by NEBOSH IGC International. They are also trained by our key manufacturers at their facilities to ensure that the installation is right from the beginning as well as to keep them abreast with the updated technical product specification. With this, rest assured that all our installation and testing & commissioning services are safe and sustainable. Our installation engineers are keen to detailed procedures on how to install different equipment in the right, proper and safe zone areas of your establishment.

CUSTOM FABRICATION

Custom fabrication is one of our greatest strengths and we take pride in having built a robust facility specially dedicated for this. We tailor products and equipment to perfectly fit the space and specific requirements of your kitchen. Our team of professionals will review the specifications, then recommend and create the most effective fabrications. Our carefully selected materials are of superior quality, hygienic, and cost-effective to provide you the maximum return on your investment.
