Semicircular Model

Free standing sheds and shelters intended to be used for vehicle parking, tank shelters, equipment shelters and other custom applications. The roofs are shaped specially to manifest the architectural custom and heritage of the region. Each model roofing is profiled to hand lay up process in an open mould. Raw materials used will be of high quality and suitable for outdoor purpose without colour fading. The roofs will be made strong enough to withstand the extreme conditions of the region. All roofing is completely finished in plant prior to dispatch Intermediate sizes with same profile / shape can be fabricated if

Comprehensive range of GRP cabinets and enclosures to meet customer requirements, suitable for both indoor and outdoor installations. All enclosures are completely finished in plant prior to dispatch. The enclosures will have smooth mould finish externally and coated hand lay up finish internally. The Products are most preferable for extreme environmental locations such as offshore / onshore oilfield, petrochemical sites and sewerage treatment areas.
