## ➤ About Us

### **Dealer & Stockist of all types of Aluminium profiles & Sheets**

Alumina Trading Co. L.L.C is a dealer and Stockist of all types of Aluminium Sheets and profiles . We cover a wide range of products and serves various clients across the GCC. We always assure in-stock to proactively meet the demands of our customers and always look forward to improve the service and product range.

## ➤ Our Mission

- Our only mission is to achieve apt respect in the aluminium and steel industry by performing with complete integrity and trust in order to be the partner of choice for our customers.
- To offer our consumers with the finest materials available.
- To introduce the highest quality products possible to the market.

## ➤ Our Vision

- The company has been escalating and attaining high success levels with the unchanged vision of offering standardized product and service of best quality.
- Betterment and sustainable growth for the environment and all of our stakeholders.

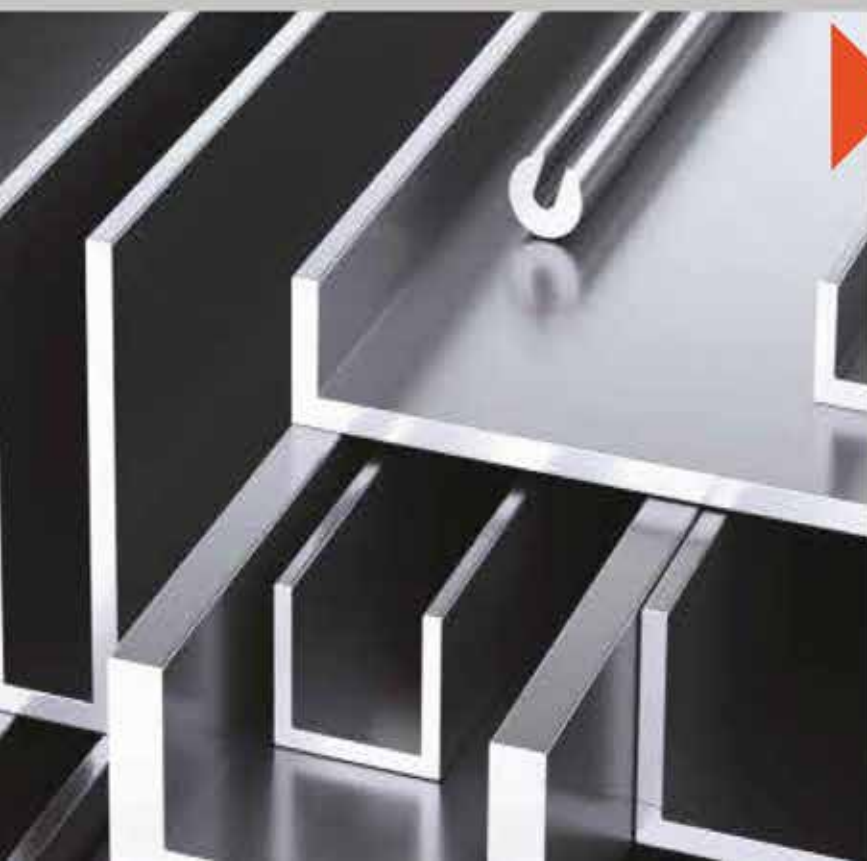

## ➤ Our Products

Aluminium Angle Bar, Aluminium Channels,  
Aluminium Round Tubes, Aluminium Rectangular Tubes,  
Aluminium Square Tubes, Aluminium Solid Bars,  
Aluminium Profile, Aluminium Chequered Plate,  
Aluminium Sheets, Aluminium Stucco Sheet, Acrylic Sheet,  
Polycarbonate Sheet, Lumber Wood

## Aluminium Angle Bar

Aluminium Angles are used predominantly to contain, protect, reinforce and support various surfaces. The smaller angles are ideal for small projects including wall corners, counters and worktop edges. Our Equal Angles are available in alloy grade 6063 T6 as a standard. These extrusions provide excellent corrosion resistance and a great surface finish. We supply all our Angles in a standard length of 6m. With the size From 12mm to 150mm, the thickness From 1mm to 10 mm.

## Aluminium Channels

Aluminium Channels (also known as 'U Channels') are general purpose extrusions that can be used in many applications. The 'U' shape of the Aluminium Channel makes it popular for both commercial and home projects. We supply our Aluminium Channels in a standard length of 6m. Aluminium Channels are available in alloy grade 6063 T6. With the size From 8mm to 200mm, the thickness From 1mm to 10 mm.

## Aluminium Round Tubes

An Aluminium Round Tubes shape makes it an ideal extrusion for use in many building projects, particularly outdoors. Depending on the size, our Aluminium Round Tubes are available in alloy grade 6063 T6 medium strength alloys with great architectural properties.

These alloys have excellent corrosion resistance making them ideal for outdoor applications

With the size From 9mm to 200mm, the thickness From 1mm to 10 mm

## Aluminium Rectangular Tubes

Aluminium Rectangular Tubes are easily fabricated into cubic or box type structures and are ideal components for building racks and window frames. Our Rectangular Tubes are available in alloy grade 6063 T6, a medium strength alloy also known as an "architectural alloy".

This material has excellent corrosion resistance making it ideal for outdoor applications. We supply our Aluminium Rectangular Tubes in a standard length of 6m with the option to 'cut-to-size' With the size From 20mm to 300mm, the thickness From 1mm to 6mm

## Aluminium Square Tubes

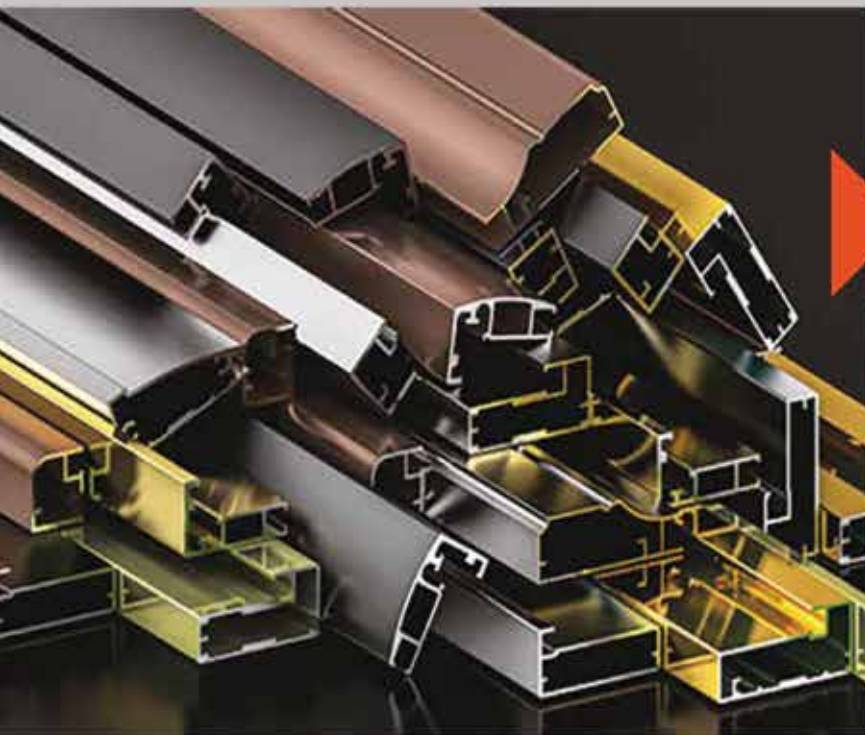

Aluminium Square Tubes are easily fabricated into cubic or box structures and are an ideal component for rack building or window frames. All our Square Tubes are available in alloy grade 6063 T6, a medium strength alloy also known in the metal industry as an 'architectural alloy'. This material has excellent corrosion resistance making it ideal for outdoor use. We supply our Aluminium Square Tubes in a standard length of 6m with the option to 'cut-to-size'.

With the size From 12mm to 200mm, the thickness From 1mm to 6 mm

## Aluminium Solid Bars

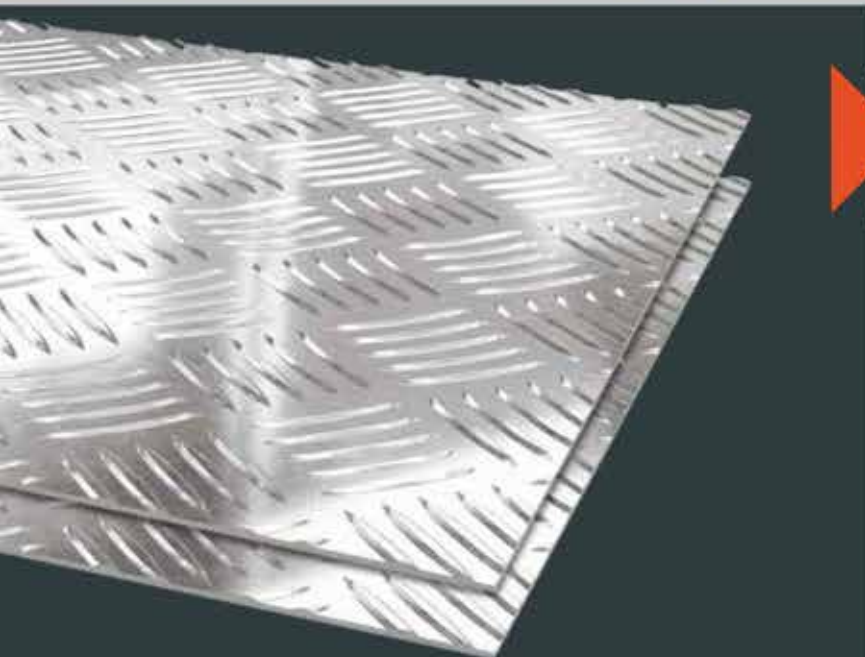

Aluminium solid bars are often used in construction, transportation, and manufacturing industries due to their strength, low weight, and corrosion resistance. It's mainly in two shapes Round and Square with different measurements and with 6 meter length. Different sizes available.

## Aluminium Profile

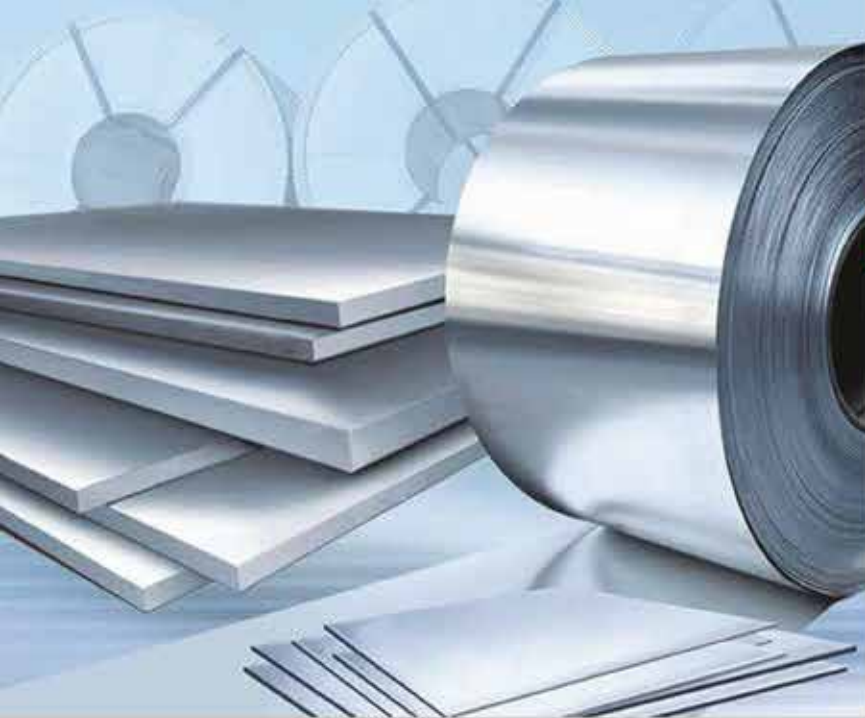

The unique advantages of aluminium, combined with the unlimited opportunities of the extrusion process, allows us to innovate, lower costs and maximize efficiency.

Used for  
Doors/Windows/Stairs/Paneling and  
Partitions

## Aluminium Chequered Plate

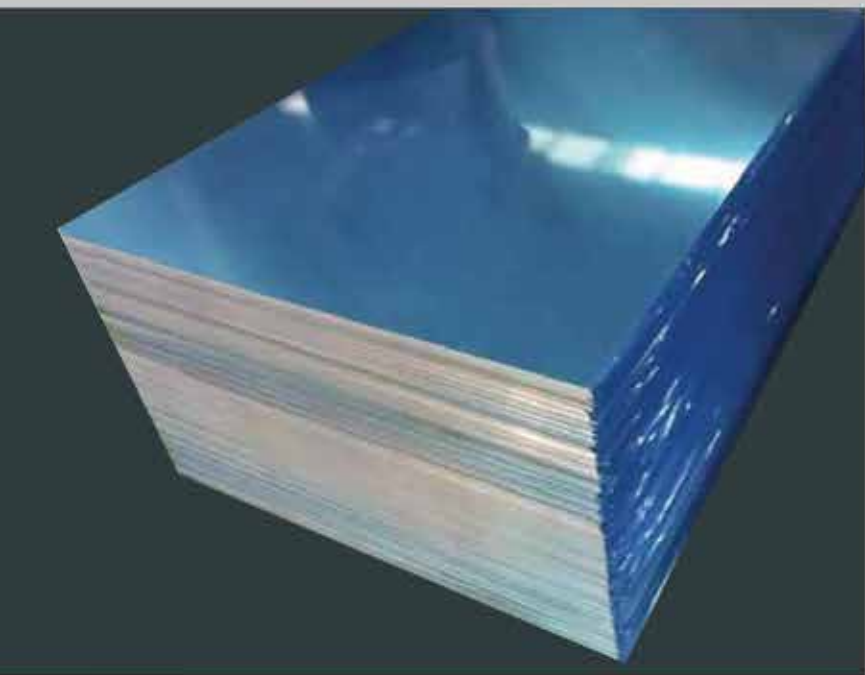

Aluminium Chequered Plate is a lightweight, functional and decorative surface material with a regular pattern of raised lines or diamonds on one side. The material is non-slip, durable and a very economical solution for corrosion resistant and non-slip applications. Aluminium Chequered Plate are available in alloy grade AA 1100 H14. With the size of 4ft x 8ft, the thickness From 1mm to 10 mm.

## Aluminium Sheets

Aluminium Sheets are lightweight, non-corrosive and easily formed or manipulated. Aluminium sheets are used for a wide range of applications such as vehicle body panels, lighting equipment, reflectors, chemical containers, signs, electronics and building materials. Our Aluminium sheet can be supplied in standard mill finish or they can be brushed, anodised or powder coated to be used in decorative applications. Aluminium Sheet is probably the most widely used form of Aluminium. We stock aluminium sheet in alloy AA1100 H14 with other alloys available on request.

With the size From 4ft x 10ft, 4ft x 8ft, 5ft x 10ft, the thickness from 0.5mm to 20mm

## Aluminium Stucco Sheet

Aluminum plate is a rectangular plate rolled from aluminum ingots. The thickness of the aluminum plate is generally greater than 0.4mm to less than 100mm, the size is generally 4ft x 8ft. Common aluminum sheets include: pure aluminum sheet, alloy aluminum sheet, thin aluminum sheet, medium-thick aluminum sheet, patterned aluminum sheet, color-coated aluminum sheet, etc. We stock aluminium Sheet in alloy AA 1100 H14 with other alloys available on request. It is a comprehensive enterprise integrating processing, manufacturing and trade

China and Hindalco, India also available

## Acrylic Sheet

Our store is equipped with highly translucent, incredibly strong Acrylic Sheets in a variety of colors and grades at the most Economical Price for you to choose from. Never be bound to an alternative as your choices are limitless with our inventory.

## Polycarbonate Sheet

We Stock and Supply long-lasting, budget friendly Polycarbonate Sheets which are highly translucent, UV protected, good heat, impact and fire resistant with good sound insulation effect.

## Lumber Wood

Plywood, Hardwood, Whitewood, MDF And Other related materials available on request
