ISO
CERTIFIED

- **Our Vision & Mission**

Vision

To become a leading utility infrastructure contracting company, recognized for innovation and value engineering.

Mission

To innovate, develop, and deliver high-quality products and services while establishing BAM as a firm known for service excellence and professional expertise.

Focus

Excel in construction by taking on unique challenges and collaborating with industry researchers to create innovative solutions.

Comprehensive Utility Infrastructure Solutions

Water Pipeline Work

Complete wet pipeline solutions including storm water, sewerage, irrigation, and potable water networks with pumping stations.

GRP Pipe & Lamination

Specialized installation of GRP and GRE pipes, field jointing, manholes, tanks, and emergency leakage repairs.

Shoring & Dewatering

Advanced shoring systems including H-Beam Walls, Contiguous Pile Walls, and comprehensive dewatering solutions.

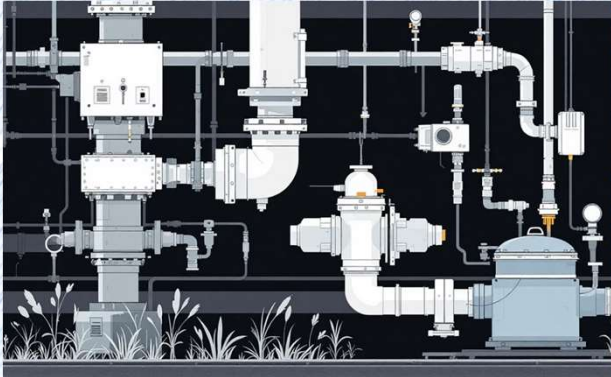

Hoop Barriers & Fencing

Custom-designed metal hoop barriers and boundary wall installations for water chambers and equipment protection.

Comprehensive Utility Infrastructure Solutions

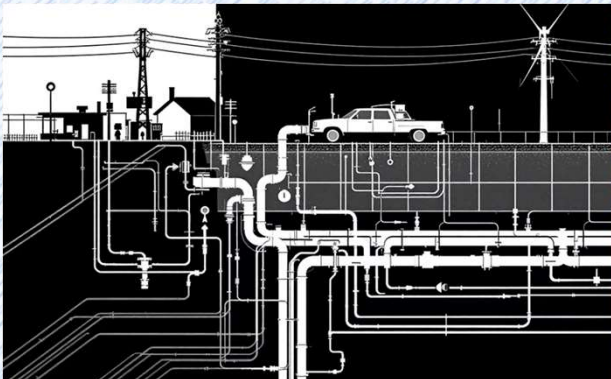

Valves, Fittings and Apparatus Installations

Professional installation and maintenance of industrial valves, pipe fittings, and specialized apparatus for water distribution and utility systems.

Chamber and Manhole Constructions

Expert construction of utility chambers and manholes using both precast concrete elements and cast in situ techniques for all wet and dry utility services network systems.

Wet & Dry Utility Networks

Complete installation and maintenance of all utility network types including gravity-fed and pressure systems for water, sewerage, telecommunications, and electrical services.

Testing, Commissioning & Handover

Complete testing and commissioning services including tie-ins and shutdowns. Comprehensive testing protocols: pressure tests, deflection tests, leak tests, structural stability tests, chlorine and bacterial tests.

Advanced Technical Capabilities

Electromechanical Systems

- Installation and maintenance of pumps, motors, generators
- Control panels and valve systems
- SCADA system integration
- Real-time monitoring solutions

Duct Laying & Cabling

- Electrical and telecommunication networks
- Optical communication systems
- CCTV and defense systems

Staffing Services

- Skilled technical personnel deployment
- Project-based workforce solutions
- Specialized utility construction teams
- Engineering and supervisory staff

Infrastructure Construction

- Culvert construction and installation
- Road construction and rehabilitation
- Hardscaping and landscape infrastructure
- Pedestrian pathways and walkways

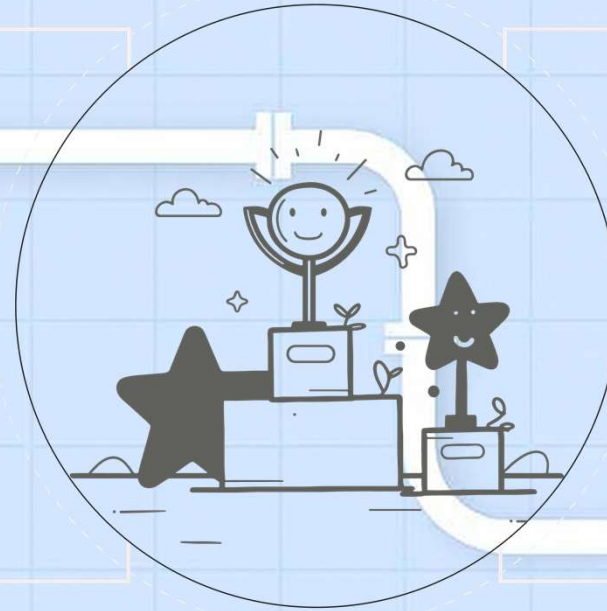

Waterproofing Solutions

Recognitions

Certified
Prequalified for Several Projects By
Multiple Authorities

Compliant
Meets safety and quality standards

Qualified
Trained technical team

Reliable
Timely project delivery

Prequalification Approved

DEWA approved for water distribution network installation activities and house connection works.

Proven Performance

Successfully completed multiple DEWA projects including Smart Distribution Management System and distribution network installations.

Infrastructure Subcontractor Approval

Approved as infrastructure subcontractor by Dubai Electricity and Water Authority for Heritage Communities

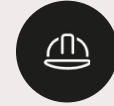

ISO 9001:2015

Quality Management System certification ensuring consistent service delivery and customer satisfaction.

ISO 14001:2015

Environmental Management System demonstrating commitment to sustainable practices.

ISO 45001:2018

Occupational Health & Safety Management System ensuring worker protection and safety excellence.

Quality Certifications

Project Portfolio Excellence

DEWA Smart Distribution Projects

Successfully completed RfX 2131700020 and RfX 2192000051 including chamber construction, pipe laying, and SCADA installations.

1

2

Sharjah Roads and Transport Authority (SRTA)

Construction of Road Culverts at Khorfakkan for improved drainage infrastructure.

Sharjah Electricity and Water Authority (SEWA)

Replacement of existing distribution network with protected line for road crossings at Al Haray Area Khorfakkan.

3

4

Sharjah Roads and Transport Authority (SRTA)

Construction of concrete road from Sharjah-Khorfakkan road to Shees Community.

Dubai Marina Waterproofing

Advanced waterproofing solutions for high-rise residential developments ensuring long-term structural protection.

5

6

Al Fahidi Historical Renovation

Underground utilities installation for Dubai Culture & Arts Authority preserving heritage while modernizing infrastructure.

Abu Dhabi Western Region Development

Comprehensive utility installation including sewerage, drainage manholes, and waterline systems for municipal projects.

7

8

DEWA Water Distribution Network

Successfully completed RfX 2132300051 for supply, installation, testing & commissioning of water distribution network and large meter connections at various locations in Dubai.

Al Maktoum International Airport

Installation of stormwater drainage system and firefighting network for the second runway project (Contract AMI/INF/001-00) at AMIA.

9

Comprehensive Resources

Skilled Workforce

20+

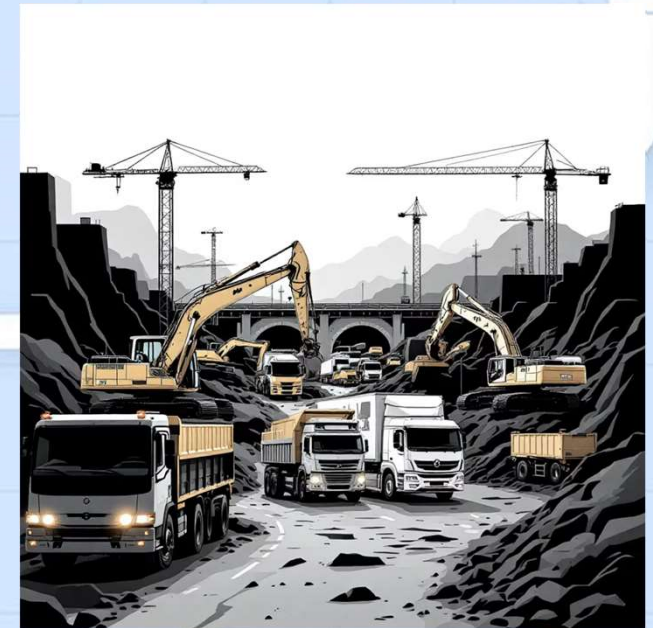

Engineers & Managers

100+

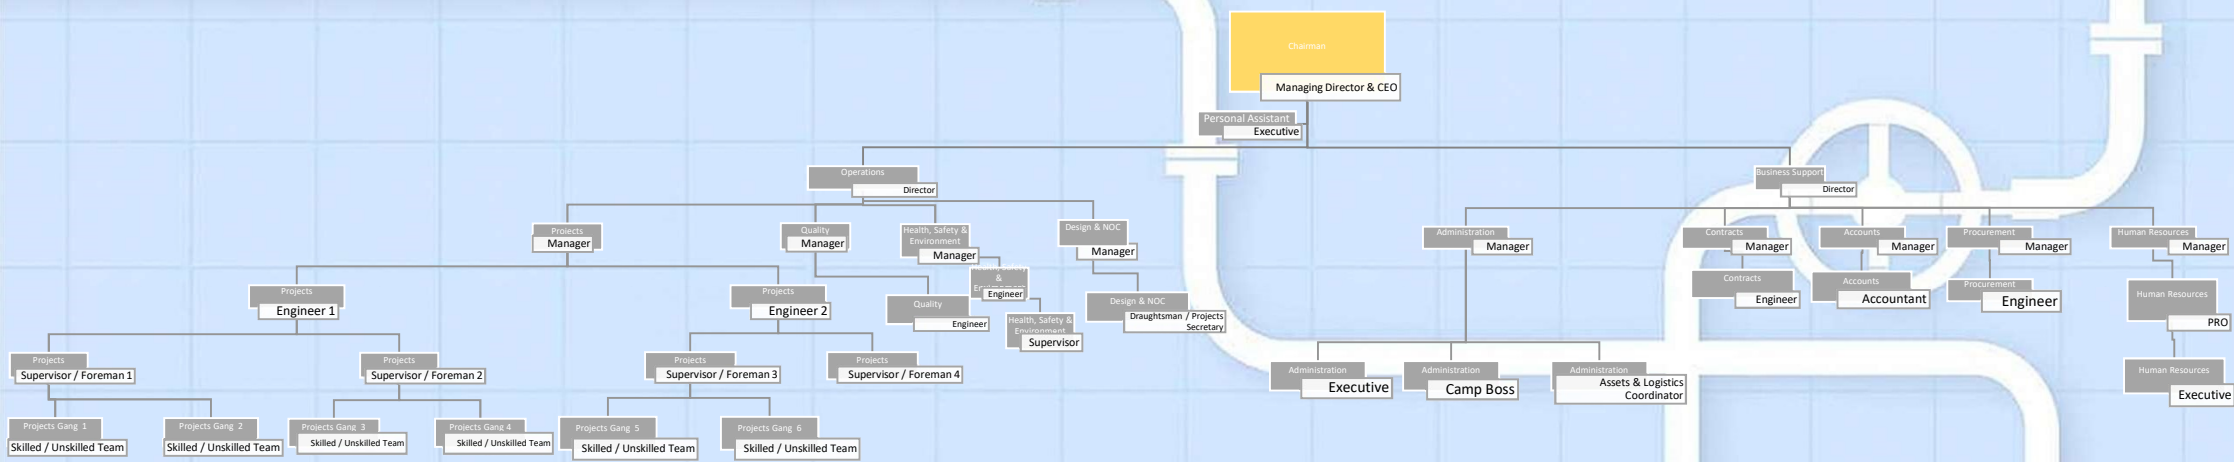

Skilled & Unskilled Workers

Fleet & Equipment

- Construction Pickup Trucks
- Backhoe & excavators
- Roller & Plate compactors
- Boom trucks & mobile tanks
- GPS, Theodolites and other survey equipment
- Light Vehicles
- Specialized pipeline equipment
