ALUMINIUM SPECIFICATIONS

Gulf Extrusions : Thermal and Non -Thermal - Thermal systems allow for much slower conduction of heat than normal aluminium. They are Long lasting, durable & offers corrosive protection.

Bi-folding Doors : Among our premier offerings, the bifolding doors exemplify the highest standards in the market, designed using premium Italian profiles that guarantee both exceptional visual appeal and exacting specifications. The Italian-manufactured aluminum enables the construction of folding windows capable of supporting a maximum weight of 120 kg per sash, with heights reaching up to 3.50 meters and configurations that can accommodate as many as eight consecutive sashes, each measuring up to 1.20 meters in width. We prioritize safety by providing the option to install a locking mechanism on each door, ensuring enhanced security for our customers.

Minimal Sections : The German Brand offers an ultra-slim, premium sliding door system that enhances any space with its sophisticated aesthetic. These doors are designed for durability and require minimal maintenance, making them an eco-friendly choice. Our slim profiles, which are increasingly sought after, are crafted from high-quality German materials, ensuring outstanding performance, functionality, and adherence to technical specifications.

Our company boasts a strong workforce of 30+ skilled workers and we take great pride in offering a 5-year warranty on all our services, including water testing. In addition, we provide our customers with a diverse selection of glass colors and aluminum profile colors to choose from, ensuring they have ample options to suit their preferences and requirements.

BI-FOLDING DOORS

DESIGN

Achieve ultimate flexibility with the Belmont's wide array of accessories. Whether you opt for a standard, embedded, or lowered threshold, the Belmont has the perfect accessories to bring your desired solutions to life.

PERFORMANCE

Belmont offers the ability to craft frames with a maximum of 7 doors, each capable of holding up to 60 kg per sash, and reaching dimensions of 2.5 m in height and 70 cm in width. The innovative system of hinges and rollers in the Belmont line enables the construction of folding windows with a maximum load of 120 kg per sash, reaching heights of 3.50 m and configurations of up to 8 consecutive sashes, each up to 1.20 m wide.

SAFETY

Safety is a top priority for Belmont when it comes to accessories for their folding system, ensuring that each sash can be equipped with a secure locking system for added protection.

FLEXIBILITY

Experience uninterrupted views of the outdoors with Belmont's aluminium bi-fold doors. Our sturdy and lightweight aluminum frames ensure easy installation and effortless opening of large panels. Customize your door with a range of opening options to optimize your wall space, and enjoy the convenience of one-directional opening. Whether it's a commercial or residential project, our bespoke design service offers hassle-free supply and installation, helping you transform your dream outdoor view into reality.

SLIM PROFILE (DOORS & WINDOWS)

Slim Line Minimalist Windows - Portuguese Origin Experience the epitome of high-end windows tailored for contemporary architecture.

Slim Line embraces the concept of "Less is more." with minimal visible tracks and frames, it enhances views and maximizes space.

Our system empowers architects and designers to create expansive and uninterrupted vistas, fostering a seamless interaction with the external environment.

From floor to ceiling without size constraints, the glass spans the entire opening, offering a "WIDER VIEW" for residents.

Sliding doors

Our slim sliding doors minimize the visible frame and track, enhancing natural light and creating spacious rooms with unobstructed views. This design effectively merges indoor and outdoor environments, resulting in a cohesive living space.

Key features include :

- 20mm slim profile that supports a large 18m² glass surface.
- Corner panels that can open and hide away into a pocket.
- Customizable lock with a multi-point system and key option.
- Unlimited rail numbers that can be completely hidden within the flooring.

Invisible frame

The Invisible Frame for doors and glass is crafted to provide a contemporary aesthetic that highlights open, unobstructed areas. By reducing the visible frame, this design elevates the visual charm of any space, facilitating a smooth flow between indoor and outdoor settings. The system accommodates expansive glass panels, permitting abundant natural light to illuminate interiors, resulting in airy and expansive environments. Ideal for modern architectural designs, this cutting-edge solution merges sophistication with utility, ensuring both style and prac-

Pivot doors

Our Pivot Doors is a standout choice for customizing your home's entryway. Designed to swing in or out, its clever weight distribution allows for very large openings with just a single panel. The large glass panel on the Pivot Door enhances views and brings in plenty of light. With custom hardware for easy operation and a low-maintenance aluminium frame, the Pivot Door combines beauty and practicality.

BI-FOLD DOORS

ALUMINIUM PIVOT DOORS.

A pivot door is a unique type of door that rotates around a vertical axis, allowing it to open in both directions. It is not only functional but also aesthetically pleasing due to its frameless design. Pivot doors serve as movable walls, blending seamlessly into the surroundings when closed and defining the space when open. Their ability to influence space, functionality, and perception makes them a superior choice compared to traditional doors. The benefits of pivot doors are numerous, with one of the most notable being their beauty and elegance. They add a touch of sophistication and style that regular doors lack, standing out as architectural elements in any space. Additionally, pivot doors can be customized to fit any design preference and come in a wide range of sizes, offering versatility and practicality. The distribution of weight in pivot doors is more even compared to traditional doors, thanks to the floor spring mechanism that integrates with the door, floor, and ceiling. The doors are available for customization in various finishes such as powder coating finish, wooden finish, and wet coat finish.
