About Burhani Oasis Enterprise LLC

Established in 2001 in Dubai, UAE, Burhani Oasis Enterprise LLC is a leading manufacturer and supplier of high-quality building materials, serving markets across the UAE, Middle East, Africa, and beyond. With a commitment to excellence, we specialize in providing innovative and durable solutions for construction and industrial applications. Our building materials division focuses on delivering a wide range of products, including corrugated sheets, profile sheets, and fire-resistant PIR sandwich panels, tailored to meet diverse project requirements. Our reputation for reliability, competitive pricing, and customer-centric service has solidified our position as a trusted partner in the industry.

Our Mission and Vision

Mission: To provide superior value-based products and services, ensuring operational excellence and customer satisfaction through quality, innovation, and reliability.

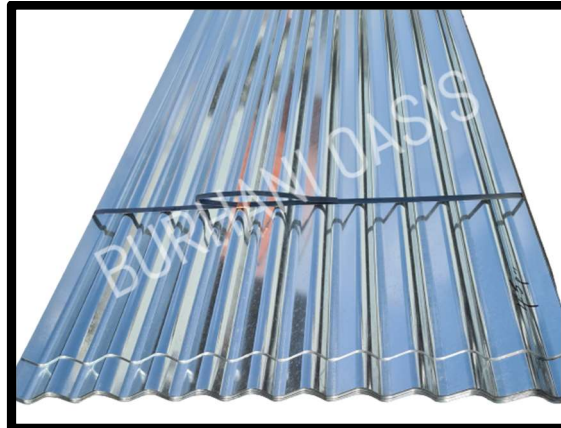

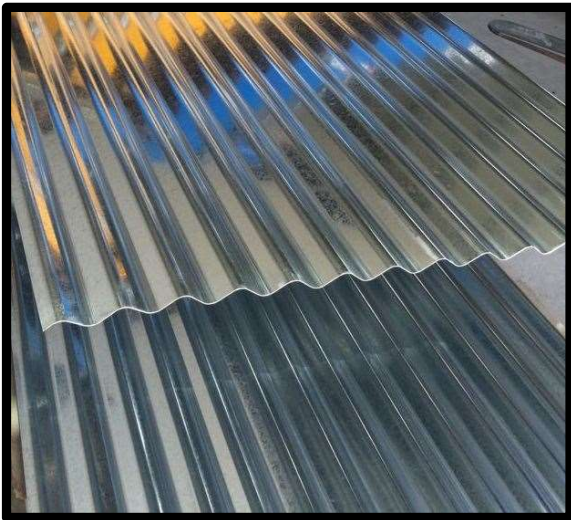

Vision: To be the leading supplier of building materials in the Middle East and Africa, driving sustainable construction solutions worldwide.

Our Products

Burhani Oasis Enterprise LLC manufactures comprehensive range of building materials, with a focus on roofing, wall cladding and interior designing materials, GI / Aluminium corrugated sheets, GI profile sheets, GI Decking Sheet, Aluminium & GI Plain Sheet and Sandwich panels PU or PIR. Our products are designed for durability, aesthetic appeal, and performance in commercial, industrial, and residential applications.

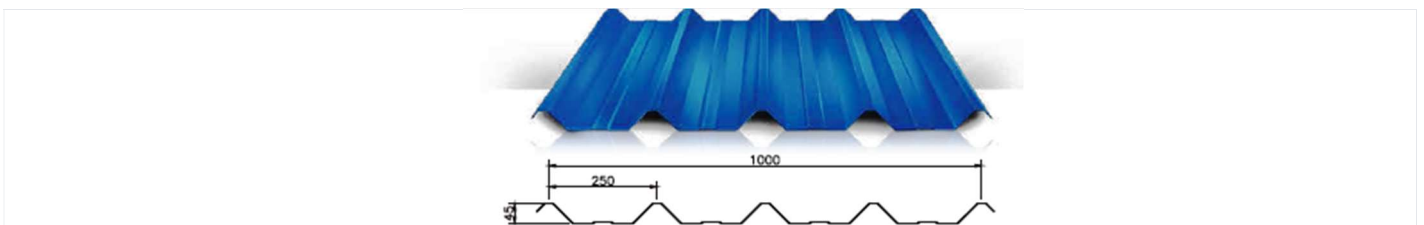

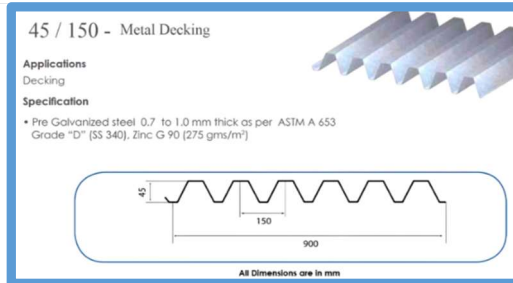

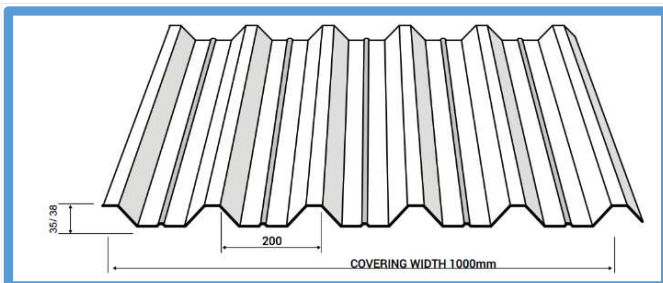

Corrugated Sheets

Our corrugated sheets, including Galvanized Iron (GI) and Aluminium, are widely used for roofing, wall cladding, and fencing. These sheets are available in various profiles (35/200, 45/150, 45/250, 18/76) and thicknesses (0.30mm to 1.20mm), offering weather resistance and structural strength. Pre-painted Galvanized Iron (PPGI) sheets come in a variety of colors, enhancing aesthetic appeal while providing corrosion resistance.

GI Corrugated Sheets: Durable and weather-resistant, ideal for industrial and commercial roofing. Available in thicknesses of 0.30mm, 0.40mm, 0.50mm, and 0.70mm.

- **Aluminium Corrugated Sheets:** Lightweight and corrosion-resistant, perfect for roofing and fencing in harsh environments. Available in mill finish or off-white color.
- **PPGI Sheets:** Prepainted for enhanced aesthetics and durability, suitable for roofing, siding, and cladding in various colors like Offwhite, Blue, Green, Red, Beige

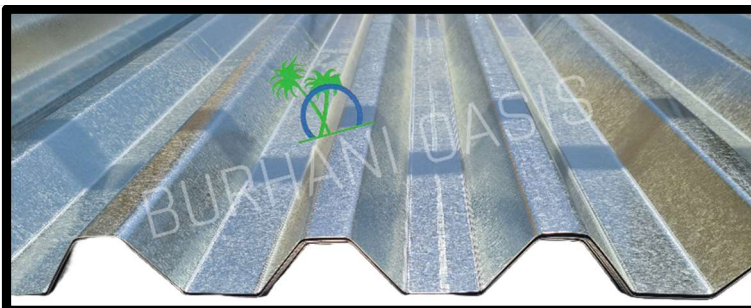

Profile Sheets

Our profile sheets, available in GI and Aluminium, are tailored to meet specific project requirements. Conforming to ASTM A653 (GI) and ASTM A792 (Aluzinc), these sheets are available in lengths from 1 to 12 meters and come in a range of colors, including RAL off-white and polyester-coated and PVDF coating options. They are ideal for roofing, wall cladding, and decking applications.

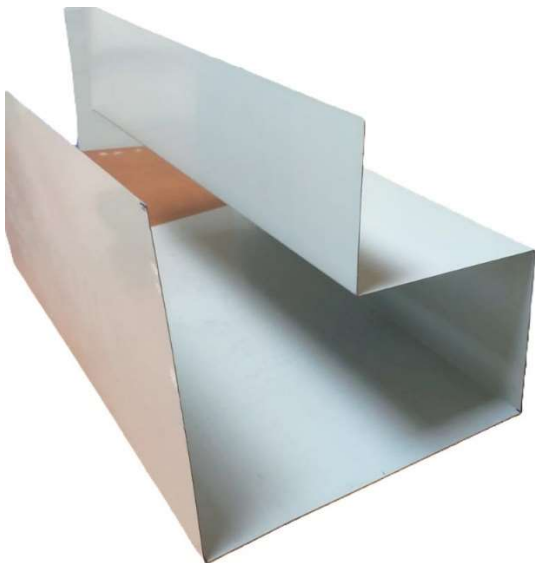

- **GI Profile Sheets:** Available in trapezoidal profiles (35/200, 45/150, 45/250) with a 25-micron polyester coating for durability.
- **Aluminium Profile Sheets:** Lightweight and strong, used for decking, wall panels, and roofing in commercial and residential projects.
- **Decking Sheets:** Commercial-grade GI decking sheets (0.70mm, 0.90mm, 1.20mm) for robust structural applications.

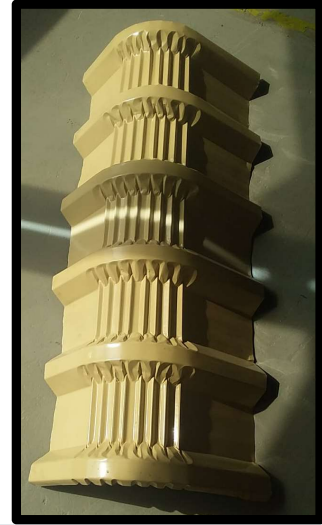

GI Plain Sheet & Aluminium Plain Flat Sheets: Our GI (Galvanized Iron) and Aluminium plain flat sheets are versatile and essential building materials. Available in various thicknesses and sizes, these sheets provide a smooth, uniform surface for a wide range of applications, including ducting, partitions, false ceilings, general fabrication, and protective coverings. They offer excellent durability, corrosion resistance, and are easily cut, bent, and formed to meet specific project requirements.

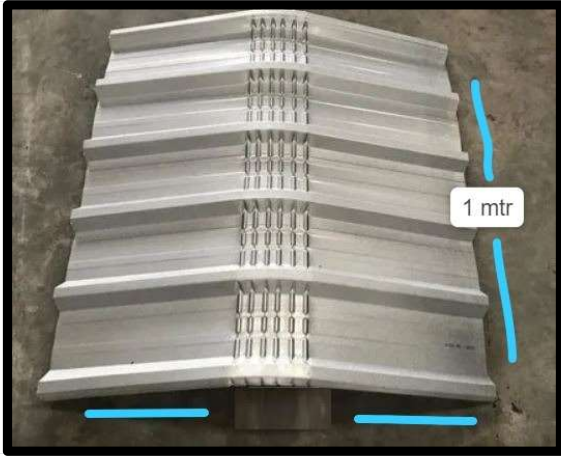

GI Gutter for Drainage: Our GI gutters are an integral part of any effective roofing system, designed to efficiently collect and channel rainwater away from the building's foundation. Constructed from durable galvanized iron, these gutters are resistant to corrosion and provide long-lasting performance. Available in various profiles and sizes, they ensure optimal drainage and protect your structure from water damage.

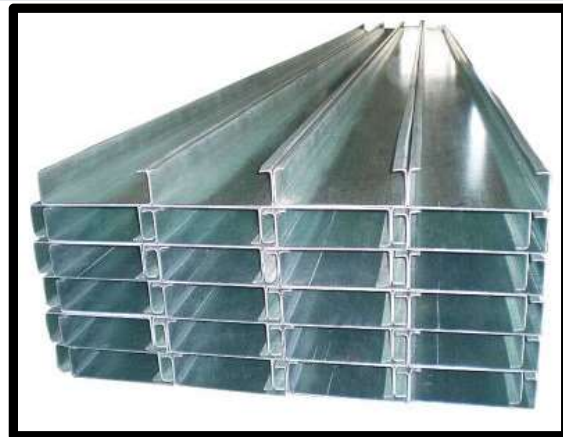

- **GI & Aluminium Curve or Bend Sheet:** Our GI and Aluminium curve sheets offer exceptional design flexibility and aesthetic appeal for roofing and architectural applications. These sheets can be custom-curved to various radius and sizes, enabling corner or edge of the covered area has pleasant building designs while maintaining the durability and avoiding water accumulation on the edge of the sheets

- **GI Top Ridge:** Essential for finishing roofing projects, our GI and Aluminium top ridge covers the apex of the roof, providing a watertight seal and a clean, aesthetic finish. Available in various thickness, lengths and angles to match roof pitches, these ridges ensure long-term durability and protection against weather elements.

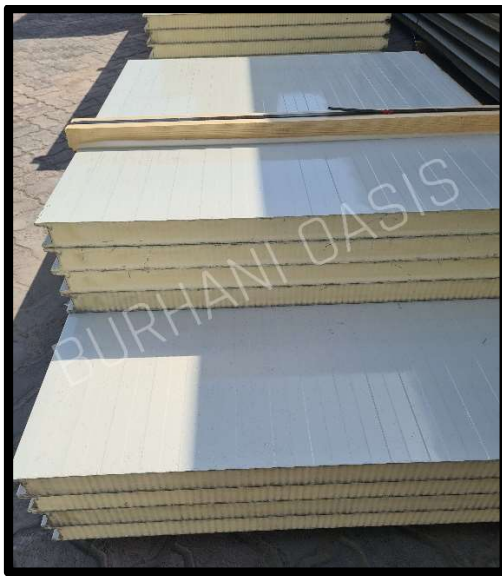

GI PURLINS – C-PURLINS | Z-PURLINS: Our GI C-Purlins and Z-Purlins are crucial secondary structural components used to support roof and wall cladding. Manufactured from high-strength galvanized iron, these purlins provide excellent load-bearing capacity and structural stability. They are available in various thickness 0.90mm, 1.20mm, 1.50mm, 2mm & 3mm and various sizes having different Web Height, Flange Width & Lip. These are essential for creating robust and durable building frameworks.

PIR or PU GI Sandwich Panels

Our Polyisocyanurate (PIR) sandwich panels are designed for superior thermal insulation and fire resistance. Featuring a rigid polyurethane foam core with thick metal sheets (GI or Aluminium) on either side, these panels offer excellent thermal conductivity ($\lambda = 0.022$) and are up to 40-60% more cost-effective than mineral wool or EPS panels. They are ideal for roofing and wall cladding in buildings requiring high insulation and safety standards.

- **GI PU OR FIRE RETARDANT PIR Sandwich Panels:** Fire-retardant with superior protective coating to prevent corrosion, suitable for industrial and commercial buildings.
- **Aluminium PIR Sandwich Panels:** Lightweight and durable, offering excellent thermal efficiency for modern construction projects.
- **Custom Sandwich Panel Manufacturing:** We offer flexible manufacturing options for sandwich panels to meet your specific project needs. This includes panels with a **Top Aluminium Profile and Bottom GI Panel** for enhanced aesthetics and durability, or panels with a **Top GI and Bottom Aluminium Foil Paper** for specialized applications requiring a lightweight and reflective finish. All custom panels are available with insulation thicknesses of **50mm, 75mm, or 100mm PU or PIR Foam**, ensuring optimal thermal performance tailored to your requirements.

Our Reach

Burhani Oasis Enterprise LLC serves a diverse clientele across the UAE (Dubai, Sharjah, Abu Dhabi, Ajman, Fujairah, Ras Al Khaimah, Umm Al Quwain), Middle East (Bahrain, Saudi Arabia, Oman, Kuwait), and Africa (Mauritania, Senegal, Burkina Faso, Kenya, Mauritius, Tanzania, Ethiopia, Seychelles, Djibouti, Uganda, Zimbabwe, Madagascar, Egypt). Our global presence ensures timely delivery and tailored solutions for all your construction needs.

Why Choose Us?

Quality Assurance: Our products meet international standards (ASTM A653, ASTM A792) for reliability and performance.

Customization: We offer tailored sizes, thicknesses, and colors to meet specific project requirements.

Competitive Pricing: Cost-effective solutions without compromising on quality.

Customer-Centric Service: Our experienced team ensures seamless procurement and delivery, backed by excellent market reputation.
