YOU..**

DUNE STEEL CONTRACTING LLC

DUNE specializes in complete PEB and Hot Rolled Steel Structure solutions, delivering everything from large-scale industrial projects to specialized custom and maintenance work with precision, speed, and reliable in-house execution. **Backed by ISO 9001, ISO 14001 and UAQ civil defence approved certifications,** our processes reflect a strong commitment to quality, consistency, and environmental responsibility.

We ensure seamless coordination, clear stage-wise payment alignment, defined scope management, and end-to-end accountability—enabling smooth, stress-free, and well-defined project execution.

The Right Partner Every Time

01

**For Project Managers
(End-to-End Steel
Structure Partner)**

We ensure end-to-end responsibility with a single point of accountability, executing every project through a structured approach from start to finish—optimized for cost, speed, and performance.

02

**For Contractors
(Fabrication & Erection
Specialist Partner)**

We provide Reliable fabrication and erection support aligned with your project timelines, seamlessly coordinating with site teams and adapting flexibly to your requirements.

03

**For Consultants
(Technical Steel Solutions
Partner)**

We follow an engineering-first approach focused on design efficiency and buildability, supported by structural optimization, cost and material insights, and detailed documentation.

04

**For Project Coordinators
(Fast Response
Service Provider)**

With rapid response and efficient service, whether it's a quick fix or a small structural adjustment, we deliver practical hassle-free solutions to keep your operations running smoothly.

Focused Services Across Steel Construction

DUNE offers a comprehensive range of services across the PEB value chain, covering design, engineering, fabrication, finishing, and on-site erection. Each service is structured to work seamlessly together, ensuring flexibility, consistency, and complete control across projects of any scale.

01

CUSTOM STEEL SOLUTIONS

Complete PEB and Hot Rolled Steel Solutions from design to erection.

02

DESIGN & ENGINEERING

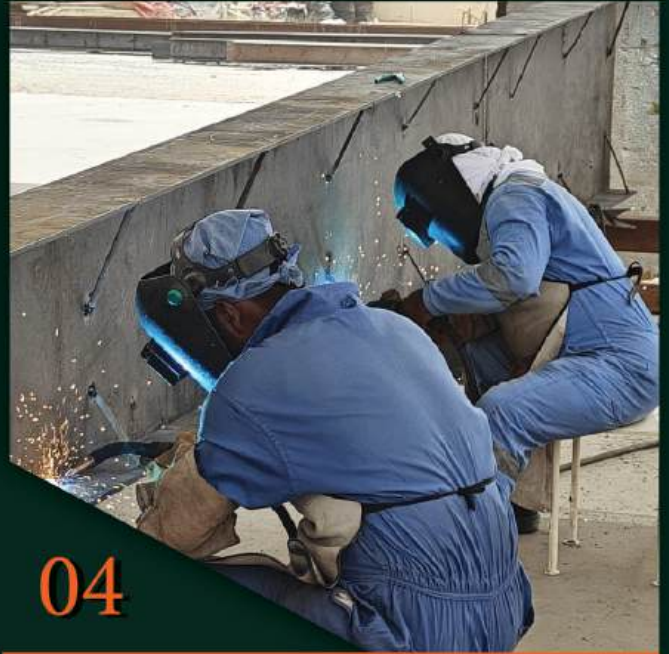

Precision-designed steel structures tailored to functional and structural requirements.

03

IN-HOUSE FABRICATION

In-house steel fabrication with precision, durability, and consistent quality control.

04

WELDING & STRUCTURAL ASSEMBLY

Welding solutions designed for strength, compliance, and reliability.

05

PAINTING & SURFACE TREATMENT

Sand blasting, industrial grade coating and finishes built to resist corrosion, weather, and wear.

06

ON-SITE ERECTION & INSTALLATION

End-to-end on-site erection ensuring safe installation and timely project delivery.

PHASE 1

Pre-Construction

We begin by aligning on project requirements, site conditions, and key technical inputs. Early-stage clarity and approvals set a strong, well-defined foundation for execution.

Planning & Engineering

Designs are refined for efficiency, feasibility, and real-world buildability. Execution plans are mapped to ensure smooth coordination across all stages.

PHASE 2

PHASE 3

Execution

Fabrication, logistics, and on-site activities are carried out in a synchronized flow. Close coordination ensures progress stays consistent, efficient, and disruption-free.

Delivery & Support

Projects are handed over with all specifications met and performance ensured. Post-delivery support ensures continuity, reliability, and long-term confidence.

PHASE 4

A Structured Execution System

The DUNE Experience; Built to Feel Effortless

With Dune, you don't manage the project. We do.

You experience a process that is structured, transparent, and dependable, where everything simply works as it should.

No confusion. No constant follow-ups.

No unnecessary stress.

Just execution you can rely on.

Mohammed Ahsan Reza

Administrator . Innovator . Visionary

Mohammed Ahsan Reza is the Managing Director of Dune Steel Contracting LLC, bringing with him a distinguished career as a retired IPS officer and a dynamic leader with a proven track record in administration, policy execution, and institutional development. After retiring as Director General in 2024, he transitioned into the private sector, leveraging his strategic mindset and executional excellence to drive business growth and operational efficiency.

During his government service, Mr. Reza led several large-scale infrastructure and public sector projects, many of which became benchmarks for profitability and sustainability. With deep expertise in project management, stakeholder coordination, and quality delivery, he now leads the company's vision of delivering high-quality steel structures and services.

Under his leadership, the company maintains a strong focus on timely execution, structural integrity, and client-centric solutions. Mr. Reza continues to bridge governance expertise with business innovation, setting new standards for reliability, efficiency, and excellence in the steel infrastructure industry.

**Build with Certainty.
Build with DUNE.**
