MACHINE WORKING

We can crimp hydraulic hoses that measure up to 4" inches in diameter with working pressure up to 6,000 psi in hydraulic Hoses and up to 8" inches in diameter for industrial Hoses.

- * Production of all types of metals up to 25 inch with precision and professionalism to meet all your needs.
- * Advanced CNC technology: Executing the most complex designs with exceptional quality.
- * Commitment to quality standards: Delivering results that exceed expectations.

"In our welding department, we provide welding services for all types of metals, including stainless steel, copper, aluminum, and carbon steel. We rely on the latest technologies to ensure precise, high-quality results that meet the needs of various industries."

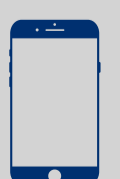

ABOUT US

We are Fluid Tech Hydraulic, proudly operating in the United Arab Emirates as an advanced branch of Fawaz Hydraulic Company, which established in 1985 in Syria. Our parent company spearheaded a revolution in hydraulic fittings manufacturing across the Arab world.

* We are committed to achieving excellence by:

- Meeting customer needs: Providing tailored solutions that align with the required standards.
- Fast production and supply: Ensuring fast production and delivery to meet our clients' needs on time.
- Quality as per requirements: Delivering precise quality levels in compliance with global standards.
- International shipping: Offering reliable and secure shipping services from the UAE to all parts of the world.
