## INTRODUCTION

Saudi Arabia and the other countries of the region have shown great development in the field of Pharmaceuticals, Food, Healthcare and Construction sectors in the last decade. We have been lot of advancement in these sectors and several new units have been established. Inspire of all this investment the region is depending on imported products from USA, Europe, Japan and other countries from all over the world, which shows a lot of opportunities for the service providers and entrepreneurs.

It is also a fact that high class technical services to support the growth in this area, which includes consultation and fabrication, are not available or the concept of quality which is a pre-request for such type of work was missing. Keeping all this in mind and seeing the reliance for such services from Europe or other countries on such a exorbitant price, the professionals having several years' experience in the Pharma, Food, Healthcare and Constructions assembled and established a company under the patronage of highly reputed and well known business family that is BIN DAYEL.

Bin Dayel industrial supplies established in 1997 and engaged in offering a huge array of products and services to its customers various industrial and commercial sectors. With its operational premises based in Saudi Arabia, our organization is executing its entire business operations as a Partnership based venture. As our organization hold specialization in the domain of manufacturing, exporting, supplying and trading, our organization is engaged in the business of products such as V belts, all type of rubber products (EPDM, NEOPRENE, NBR, SBR, NR, SILICONE, FOOD GRADE), Bearings, Gasket Sheets, Stainless steel wire mesh (304, 316) Teflon items, Belt jointing, FOOD conveyor and processing belt, Compressed Asbestos Fiber Sheet, Compressed Non Asbestos Jointing Sheet, Beater Addition Jointing Sheet, Asbestos Packing, Asbestos Gland Packing, Ceramic Fiber and all kind of mechanical spares parts, rubber moulding & fabrications and many more. We have found good business in various international markets across the globe. Our ethical business polices quality commitments, core values are driven towards customer delight.

We practice latest techniques to get the supreme quality of final product which we offer to the chief market. Our product ranges are robust and sturdy in construction and are stringently tested on various parameters of quality which help us make our customers satisfied with our product quality. Our vendors also help us to get the desired quality product. We make every possible effort to make our client happy, and indemnified with our offerings.
