INDOGULF CENTRAL GAS LLC

YOUR TRUSTED PARTNER FOR GAS SOLUTION

ABOUT OUR COMPANY

Indogulf Central Gas has made a significant mark in the gas industry in UAE since its inception, we entered the liquified petroleum gas market in 2002 with an intention to provide complete solution for todays LPG requirements. The company was formed by a Engineering expert in the industry and has been oriented across the world now worth our domestic as well as international quality services. In an industry that has traditionally been dominated by one player, our aim has been to provide a breath of fresh air to our customer and offer a valid alternative.

OUR VISION

With a commitment and drive that we belive to be unsurpassed in the industry, our aim is to continue to outshine the opposition with a service offering that is not only first rate, but also innovative and forward thinking. Once we've won your business, we wont rest our lauerls, we always looking at ways to improve our service and save your money. This attitude has seen us take a forward looking approach to the alternative energy market and we can now offer a complete approach to energy services in today's carbon aware society.

OUR MISSION

We see ourselves as different, priding ourselves on talking in a more caring, down to earth manner. We do business this way because we think it gives us the best chance of developing lasting relationships with our customers. We're a people business, not a giant faceless organisation. We have no problem in selling our products and services, but we try not to shout about our achievements too much, we're more concerne about what we can do for our customers.
