Sliding Doors

Noor Al Hashmi Technical Works offers manual and automatic sliding door systems for industrial, commercial, healthcare, and retail use. They offer proven functionality, performance, and longevity. Our automatic sliding doors include heavy-duty belt drive door systems engineered to provide long life and quiet operation in high-traffic environments.

Noor Al Hashmi Technical works has the expertise, experience and equipment to provide the ideal door solution for the most demanding and challenging uses. We can handle any kind of projects—from large to small scale—and are dedicated to providing you with the best customer service. We install & service all automatic ADA & sliding doors no matter the brand name.

Revolving Doors

Noor Al Hashmi technical works offers a variety of automatic and manual revolving doors. Revolving doors are durable and low-maintenance entrance solutions. Our stylish and energy-efficient revolving doors provide smooth, safe building access for offices, hotels, retail centers, airports and medical facilities.

The always open, always closed principle of a revolving door ensures that the conditioned inside air and the unconditioned outside air remain separated, preventing draft, dust and noise coming into the building. As less energy is required to maintain the conditioned climate inside the building, revolving doors help reduce the carbon footprint of a building and save both energy and cost.

Swinging Doors

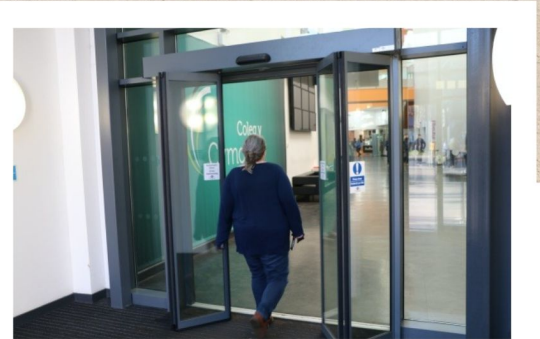

Available in in-swing, out-swing, left or right-handed, and are compatible with all electrical or mechanical hardware. Designed for the most demanding applications. Multiple configurations available including overhead concealed and surface applied mounting with choice of inswing, outswing, and parallel inswing configurations.

Used for corridor applications. Multiple configurations are available including fold-in and fold-out. Magnetic locks are available with the fold-out option. Ideal for vestibules and hospital corridors that require wide openings in a narrow space.

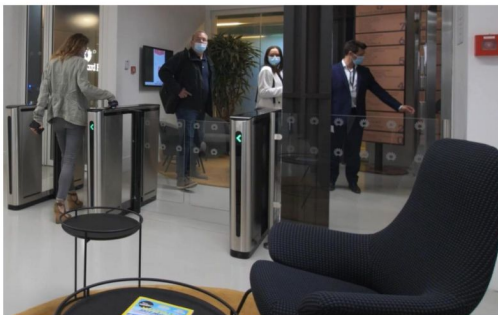

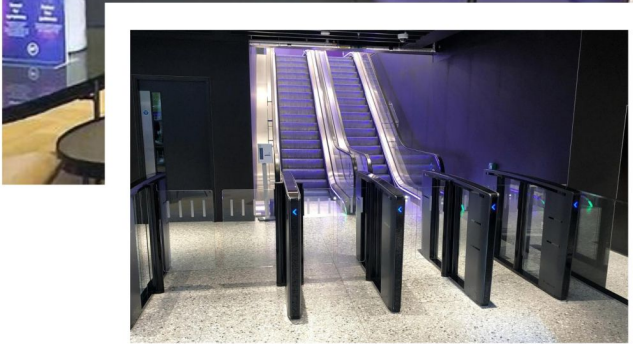

Our high-quality swinging doors are ideal for an array of applications:

- Retail Operations
- Hospitals
- Hotels
- Office Buildings
- Industrial
- Airports
- Government
- Schools and Libraries

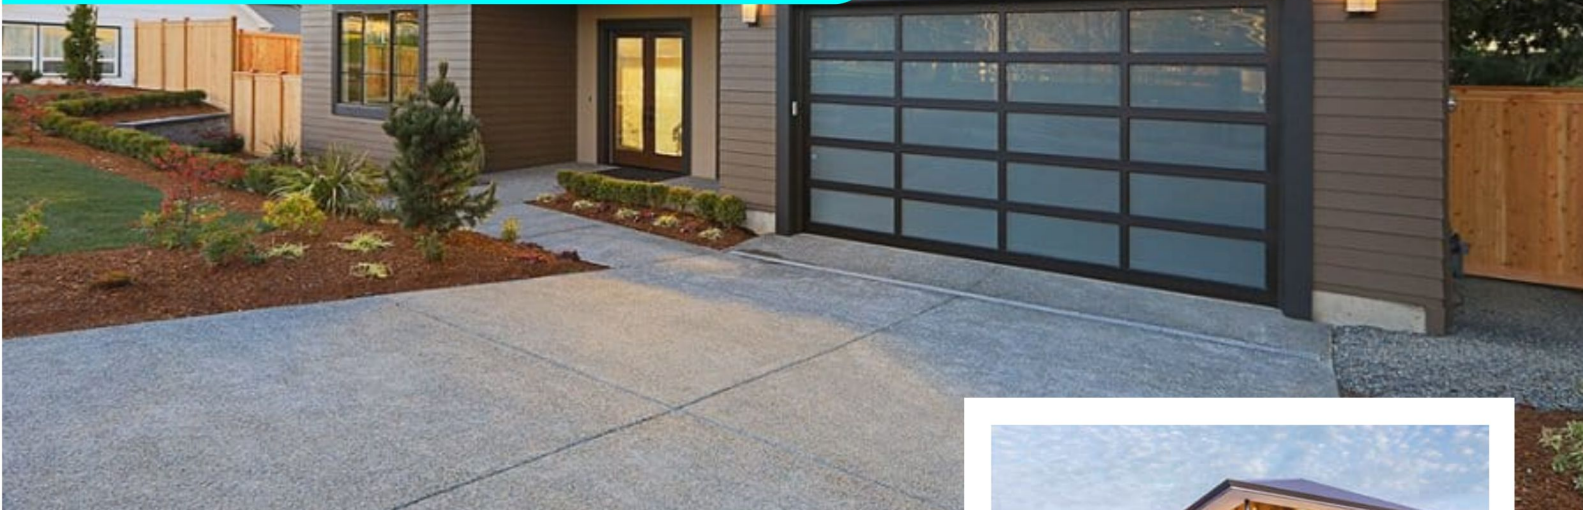

Access Gates

Buildings cater to a wide variety of visitors: regular visitors, one-time visitors, visitors in wheelchairs, visitors with baggage or delivery carts, and many more. Access gates use swinging barriers made of glass or metal to accommodate all types of visitors and are designed to complement our speed gate and turnstile ranges.

Our secured entry solutions can easily be integrated with virtually any access control system. Card readers, fingerprint readers or other authorisation systems can be integrated in the column of the access gates itself or on an optional secondary pedestal or column that can be placed in the vicinity of the gate itself. This allows for a more fluid entry process.

Garage Doors

Noor Al Hashmi Technical Works is a leading provider of garage doors offering services such as new installations, repairs, opener installation and repair, and general maintenance.

- Installation. We install any residential or commercial overhead garage doors and garage door openers as well as side-mount garage door openers.
- Repair. We repair any residential or commercial garage door or garage door opener, no matter the brand. Our experienced garage door technicians have seen them all.
- Maintenance. This includes tune-up and full lubrication of all garage door and opener systems to fix pesky, squeaky and noisy doors. We also perform safety inspections to ensure the door and opener reverse as required.
- Aesthetic improvements. This includes replacement of damaged or rotted door panels, and hardware overhaul or replacement.

Automatic Gates

If your industrial, commercial or farm property needs more security but you wish to keep access and egress simple, or if you have in mind an eye-catching, easy-to-open automatic gate for your residence, talk to us about our standard automatic gates and barriers or the customised solution you require.

Contact us today for more information about our wide range of services and to get a free and no obligation quote. From concept through design and manufacture to installation and after-sales service, we can supply the automatic gate that's just right for your property.
