ABOUT US

We are renowned trading company based in UAE committed to the efficient distribution of the world's finest natural renewable resources wood products. We import, export and trade in veneers and glues. We are equipped with a wide range of natural veneers in buffer-stock, which enable the project to make time-bound deliveries and instill formidable confidence among the benevolent customers, in the past. Moreover, our sustained enthusiasm and full-fledged experience to select what the customer needs, has helped us to establish supremacy in the field of veneer business. We offer species for making gorgeous furniture, such as Beech, American Cherry, American Walnut, Red Oak, White Oak, Mahogany, Sapeli, steamed or red hearted, Ash, Alder and Birch. The spectrum of colour ranges from light tones to beige and reddish nuances, upto a moderate brown. Also species like Dark Walnut, Dark Oak and tropical species such as zebrano wood, Rosewood, Teak or Wenge are available

VENEER PRESSING/LAMINATE PRESSING/DOOR MANUFACTURING

MAKE WOODWORKING EASY

- EXCELLENT BOND STRENGTH
- SUPERIOR SPREADABILITY

Application areas:
 Furniture making, handicraft, sports goods, packaging, bookbinding, wallpapers, carpet manufacturing, etc.

THE MONSTER OF BONDING

- IDEAL FOR FURNITURE MANUFACTURING
- HIGH COVERAGE & SPREADABILITY

Application areas:
 Woodworking and general bonding applications

POWER PRESS
POWDER GLUE UR-104

NATURAL VENEER

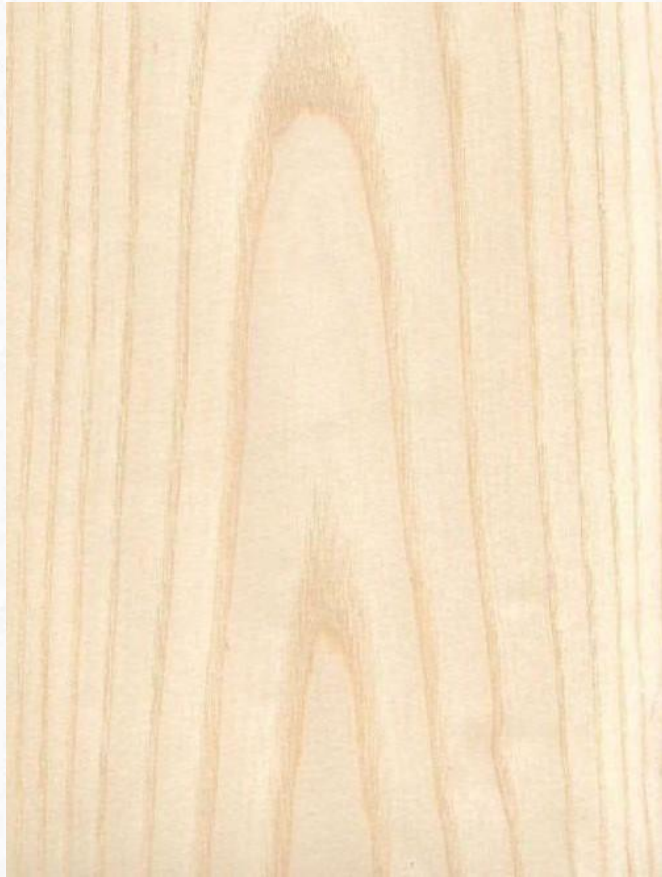

Natural veneer is a unique material sliced from logs that is influenced by an individual tree's reaction to its soil composition, geographic location and other growing conditions throughout the duration of its growth. The intrinsic patterns and markings in natural veneers aren't altered or enhanced in any way, making each natural veneer from a tree an individual work of art.

PEAR WOOD

RECONSTITUTED VENEER

These veneers are made by slicing artificial logs made from light-color softer hardwoods, such as Basswood, Obeche, or Poplar. These logs are manipulated by slicing methods, gluing schemes and color staining in order to create a new man-made log. Reconstituted wood veneer is created with consistency using real wood from natural, renewable sources. It mimics your favorite wood veneer species and is free from natural defects. This veneer is the perfect solution for the eco-friendly consumer.
