SERVICE & SUPPORT

ASHORE - AFLOAT - ON VOYAGE

“Strong commitment
and total dedication
to all projects”

Automation Services

- Integrated alarm monitoring and control system
- Integrated bridge control system
- Integrated yacht automation system
- Power control and management system
- Engine/Genset control and alarm system
- HVAC control system
- Propulsion control system
- Vapour Alarm and oil mist detection system
- Winch and Crane control system

“Committed to follow the
highest standards of
performance and ethics”

Mechanical Services

- Design and supply of complete range of marine & fresh water hydrophore system
- Design and supply of waste management solutions
- Servicing and testing of pumps, compressors, gearboxes
- Servicing of sewage plants, OWS and Fresh water marker
- Design and supply of Calorifier systems with circulating pumps

Electrical Services

- Troubleshooting and rectification of electrical system
- Switchboard upgradations
- Power management systems
- DP conversions
- Containerized switchboards
- Breaker testing and calibration
- Electric & Hybrid conversion solutions

"Reliable maritime partner"

Technology Ventures Middle East started out as a team of professional in 2004 and is one of the leading marine solution provider today, specializing in a diverse range of equipment supply & services in the marine and offshore industry

Our knowledge, expertise and resource make us pioneers by setting new industry standards. We equip clients with up-to-date technology & trends and offer completely integrated solutions by supplying products from globally renowned brands, as well as performing service and maintenance activities.

Having in-depth insight and with relevant experience we steer clients through the right direction guaranteeing excellent performance and more essentially sustainable client confidence. In short, we are a one-stop shop for failure-free marine, automation and control instrumentation services.

Our success is facilitated by a dynamic team of technically qualified professionals who ably navigate through client needs and expectations and provide products and solutions across Design, Development, Sales, Service and Spare

Turnkey Solutions

▶ Ballast Water Treatment Solutions

We provide complete turnkey solution including feasibility study, engineering, Supply, installation, Class submission, commissioning and handover to owner.

▶ Complete Electrical System

We provide complete electrical system solution from design, supply of switchboards and other electrical equipments to cable laying, termination and commissioning.

▶ Integrated Alarm Monitoring and Control System

Machinery alarm monitoring and control, Cargo alarm and monitoring, tank gauging, interface for all systems integrated into a single automated system with touchscreen interface

▶ Integrated Bridge and Navigation System

All bridge and navigational equipments integrated into single system with touchscreen interface instead of multiple screens and equipments.

▶ Yacht Automation System

Includes lighting controls, curtain controls, door controls, vessel alarm monitoring all integrated into a single automation system with accessibility on Tablet/Ipad.

▶ Fire Detection System

Includes design, supply and installation of complete Fire Detection System with integration and interfacing with central vessel automation system.

▶ ICCP-MGPS System

Design, supply, installation and commissioning of ICCP-MGPS System.
