- Sales@umitrailers.com - Submit Inquiries
- Spare-Parts@umitrailers.com - Trailers Spare Parts

INTRODUCTION

UMI Trailers Manufacturing has been a reliable name in industrial trailer production since 2013. Operating from Dubai, UAE, our facility has manufactured over 10,000 trailers to customers across multiple industries and has a proven track record of working with key industry leaders and prominent companies across the UAE.

FOUNDER STATEMENT

"Deliver excellence today and build trust for tomorrow. This is the foundation of Umi Trailers."

— Muahammed Irfan

Supporting the UAE Construction (2024–2025)

Towards the end of 2024 and the beginning of 2025, construction activity in the UAE increased significantly. Trailer demand rose by almost 70%, and much of the country’s transport fleet was fully occupied. During this period UMI Trailers worked closely with major construction companies including Trojan Construction, Abu Dhabi Precast, HYTEC and Exceed to help them overcome trailer shortages and keep their projects running on schedule

To support this surge, we manufactured over a hundred trailers, including:

- A-Frame Trailers
- Custom Convertible Lowbed A-Frame Trailers
- Specialized and tailor-made units designed for specific construction and precast needs

This period demonstrated our ability to scale production quickly while maintaining the quality

Clients

Trusted by leading companies across transport, construction, logistics and industrial sectors
