ALUMINIUM SYSTEM WINDOWS

We provide Aluminium System Windows with the premium branded systems serving the architectural, commercial, and residential sectors. With a strong commitment to quality, technology, and design excellence, we transform building facades and interiors into modern, energy-efficient, and visually striking spaces.

ADVANTAGES

Customized Systems

characterized by their extreme flexibility and comes in many shapes, colours and finishes. Its elegant and customized design and innovative technology can meet every architectural need.

Sound Insulation

studied and built with modern technology to reduce the problem of sound pollution from the outdoor environment caused by modern life.

Maintenance Free

made of high-quality materials, materials that require minimal maintenance and last long as your house, you can happily say No to costly repairs.

Weather Resistant

built with engineering precision. ZAFCON's product range when installed in accordance with known installation European standard.

Thermal Insulation

provide excellent thermal insulation, the PERFECTION slide can achieve as low as 1.1 W/m²K by using Double Glazed Units.

UV Resistant

capable of protecting from high UV index. Entire process from raw material selection to advanced extruding to further processing is formulated to attain highest quality profiles capable to resist UV radiations which are generally high in Indian subcontinent

Wind Load

stand storms with wind pressure of over 3000 Pascal which is equivalent to a speed of 245 km/hr. This provides excellent application flexibility for today's modern high rise building structure.
