

MARBLE RENEWAL UAE LLC

Masters of Marble & Stone Restoration
for
Commercial & Residential Projects

About Us

Marble Renewal UAE LLC was founded in 1998 and quickly became the 'Leading Natural Stone Care Specialist' in the UAE.

Services provided include the latest most advanced and highest quality restoration services, preventative care, maintenance services, innovative products as well as practical advice, recommendations and problem-solving solutions.

Marble Renewal UAE also serves other marble renewal companies in the Middle East, Asia and Australia.

Our employees are professionals that are 'properly trained' to care for surfaces and also provide the latest ideas and concepts of this industry.

We can expertly maintain your floors through a maintenance program guaranteed to reduce your labour and chemicals costs.

Marble Restoration

Marble Renewal can produce a restoration sample on your marble before any cost is incurred, Marble is a natural stone; therefore wear will vary due to the quality and hardness of the stone in high traffic areas. Our process will restore stone to a clean, 'properly finished' surface without the use of detrimental topical coatings such as harmful waxes, sealers and acids.

Decorative Bar & Vanity Tops

Acid levels in many drinks and fruits actually etch (scratch) polished marble tops. Our bar and vanity top restoration program removes all etching, seals and polishes. Marble vanity tops experience many of the same problems. Our unique process restores bar and vanity tops and protects them from further damage.

All Stone & Tiled Surfaces

Professional restoration and care of all stones, granites, pavers, tiles and many man made surfaces.

Terrazzo Restoration

Terrazzo has a unique beauty when newly restored and polished. The Marble Renewal process can restore a worn, wax-coated floor to a look that surpasses the original installation, without topical solutions.

Slip Safety

Marble Renewal offers a complete line of floor care products designed to insure slip-safety on walking surfaces. We also offer a slip-safe monitoring program which provides monthly slip testing.
